

VR3 LAT PULL TOTAL ACCESS

FEATURES

Bar handle height adjustment This lever operated single arm handle height adjustment allows the bar to be adjusted for shorter and wheelchair users down to 1400mm start height from a seated position.

Adjustable knee restraint and seat height allows shorter users and others with reduced trunk stability to maintain full flat foot contact with the floor. This permits correct pelvic positioning and avoids a round back during exercise.

Instructions at seated user height ensures ease of reading from a seated position by all users including wheelchair users.

Raised numbering with large fonts facilitates easy adjustment for older or visually impaired users.

User accessible weight stack offers ease of weight selection from seated exercise position.

Twist select weight adjustment Weight stack with low start weight and integral three-position Twist Select systems offering 2.5 kg increments is suitable for inexperienced and older users.

SPECIFICATIONS

Product Number	14130
Dimensions L x W x H	55" x 55" x 91" (141 cm x 140 cm x 231 cm)
Standard Weight Stack	245 lbs (111 kg)
Heavy Weight Stack	305 lbs (138 kg)
