

# Cat<sup>®</sup> B Series Wheel Saws

SKID STEER LOADERS  
MULTI TERRAIN LOADERS  
COMPACT TRACK LOADERS  
COMPACT WHEEL LOADERS

Cat<sup>®</sup> Wheel Saws are designed for high-performance trench cutting on a variety of hard or compact surfaces, such as asphalt, reinforced concrete and rocky or frozen ground.

## Features:

### Direct drive system

- Direct drive system features a hydraulic piston pump motor to ensure maximum cutting rate and wheel torque for optimal production performance and efficiency.

### Hydraulic side-shift and depth control

- Hydraulic side-shift and depth control is standard on all models and is controlled from the operator's compartment. Hydraulic side-shift allows wheel positioning from center to the far right of center. This allows for cutting close to curbs, walls and other obstructions, and minimizes need to reposition the machine.

### Trench cleaning device

- The trench cleaning device is hydraulically operated from the operator's compartment. The blade can be controlled up and down to remove spoil and ensure a clean trench.

### Deflector plates

- Deflector plates remove spoil from the machine's path for smooth operation. Spoil can be discharged left, right, or on both sides of the wheel saw with installation of included blanking plates.

### Bits

- Concrete bits are standard on all models. Optional all purpose conical bits are available for all Cat Wheel Saws for tarmac and asphalt applications. Extreme life bits are available for extreme duty Cat Wheel Saw applications.

### Quick coupler

- Rugged, opposing edge design holds the work tool securely and allows the operator to quickly change from one high performance Cat Work Tool to another.

### Max Pro Pressure Gauge

- Max Pro Pressure Gauge provides operator feedback to adjust speed for maximum productivity in changing material loads. Gauge displays planer performance in real-time conditions and is visible from the cab. Standard on XHP models.

### Guide bar

- Optional guide bar allows operator to position wheel saw for a straight cut and aids in visibility.

### Self standing

- Self standing frame design improves connection and parking.
