

# Maneuvering Solutions

Cat® Three60 Product Line

Enjoy fast and easy docking, fingertip maneuvering control, and much more. The Three60 suite of solutions from Caterpillar Marine offers three options for maneuvering of vessels with conventional and pod drives.

- **Three60 Precision Control** is a complete system for conventional drive yachts with precision maneuvering and “Station Keeping.” The supplied system includes joystick(s), leverhead(s), electronics, and hydraulic thruster(s).
- **Three60 Assist** is a limited duty cycle system for use while docking and maneuvering yachts. The supplied system includes joystick(s), leverhead(s), electronics, and electric thruster(s).
- **Three60 Pod** is a complete electronic control system and mechanical pod drive for Cat® C12.9, C8.7, and C7.1 propulsion engines.

Unmatched response and performance – we’re built to put you in control.
