Maximize production. Reduce costs.

Cat® Productivity Optimizer is a web-based application that delivers advanced compressor production analytics to improve productivity, reduce operating cost, and maximize profit.

Production, maintenance, and management features
- Quantify reliability, availability, and utilization rates
- Identify production threats and optimization opportunities
- Measure downtime events
- Quantify production increases by configuration
- Determine loss reduction targets
- Identify emissions reduction opportunities
- Calculate fuel reduction gains
Cat® Productivity Optimizer

- Web-based application with access controls allows for remote collaboration and troubleshooting
- Well life cycle and compression equipment planning
- Asset management
- Fuel consumption calculation and tracking across the fleet
- Safe source for compressor configuration and setup information
