# MY ROAD TO SUCCESS

STARTS HERE

*Become a genuine leader for a Fortune 50 global organization, gain deep technical experience in your chosen field, and work as part of a global team...*

*The Engineering Rotational Development Program (ERDP) will provide you the foundation for future success as a selected member of Caterpillar's technical community. **Opportunities are endless.***

## ENGINEERING ROTATIONAL DEVELOPMENT PROGRAM (ERDP)

Caterpillar hires top talent — and this program is all about developing the next generation of industry leaders and technical experts. The purpose of Caterpillar's ERDP is to harness your ability and further develop you through rotational assignments and learning opportunities so that you may not only fulfill your career ambition, but provide excellent service to Caterpillar and its customers.

You will gain a wealth of experience while in the development program. ERDP offers you a broad exposure to Caterpillar, presents diverse project responsibilities, engages you in global teams, provides cross-functional job experiences, and includes valuable networking opportunities with all levels of Caterpillar leadership.

**In short, as soon as you enter one of Caterpillar's global facilities... you hit the ground running.**

### CHEMICAL ENGINEERING TRACK

## ENGINEERING ROTATIONAL DEVELOPMENT PROGRAM

### TRAINING

- Safety
- Program onboarding
- Technical core training
- Manufacturing fundamentals
- Track specific training
- Professional and leadership development
- Career development planning

### ROTATIONAL EXPERIENCE

- Three-year program
- Two rotations
- Eighteen month rotation in process engineering
- Eighteen month rotation may include but not limited to: research, heat treat, product design, materials engineering and environmental engineering
- Positions may be available throughout midwest and southeast U.S.
- On-the-job learning
- Challenging deliverables

### GRADUATE PLACEMENT

- Upon completion of your last rotational assignment, you will be placed in a two to three year assignment.
- Placement will be determined by a combination of individual preference and business requirements. Positions may include areas such as:
  - Product engineering
  - Process engineering
  - Supplier quality
  - Environmental engineering
  - Research & development
  - Supervision

*The Chemical Engineering community includes **chemical product and processes related to Specialty Products, Remanufacturing, and Advanced Materials Technology.** It collaborates in **R&D, Engineering, Manufacturing, and Supplier Development** around the enterprise.*
