

Solar® Turbines

A Caterpillar Company

Worldwide Turbomachinery Support

Solar Certified Service Parts

Solar offers worldwide service parts support for its entire gas turbine product line to make sure that you have the right part, at the right place, at the right time.

As the OEM, Solar is best positioned to meet your needs when it comes to getting the parts required to keep your gas turbine running. We know our parts better than anyone, and back them with the engineering knowledge, availability, logistics and personal service required to operate your Solar® gas turbine at peak efficiency.

Global Availability

Solar gas turbines are at work around the world, and to keep them operating at peak efficiency, we maintain 23 parts order management locations in 18 countries. No matter where you're located, Solar Turbines maintains offices worldwide to provide Solar certified service parts for all your needs.

Genuine Certified Solar Parts Make the Difference

Specifying genuine Solar certified parts for your gas turbine equipment assures you the lowest cost of ownership, and provides the reliable performance you expect. Why risk

early performance degradation, equipment damage or shutdowns that may result from substituting non-qualified parts? Only genuine Solar certified parts are designed, manufactured, tested and guaranteed to meet Solar's stringent standards for superior aerodynamic performance, mechanical integrity, material properties and quality.

Professional Service on a Personal Level

We take pride in being good at more than just designing, manufacturing and providing the parts you need. A thoroughly trained, experienced parts staff member is available 24/7/365 to work with you person-to-person and help you understand what parts are needed. Our field service organization will provide you with the technical expertise and direction on how to install parts correctly. And whenever you call, someone will be there to pick up the phone.

Worldwide Turbomachinery Support

Worldwide Facilities

A global network of 23 order administration offices and part centers are ready 24 hours per day, 7 days per week, 365 days per year to help you with the right parts, where and when you need them.

Reliability You Can Depend On

At Solar, equipment reliability is our number one priority, which is why our certified parts program includes:

- 24-hour parts distribution network
- Global availability
- Personal service, knowledgeable people
- Dedicated engineering, technical support and installation
- Optional component refurbishment and exchange program
- Guaranteed quality assurance and certification standards throughout our design, manufacturing, and testing processes

Rapid Response to Emergency Needs

Solar gas turbines are typically found in critical applications, meaning you can't afford to have yours out of service. That's why we offer emergency prioritization and shipment on the first available carrier to get you the parts you need as quickly as possible. From basics like nuts, washers and bolts, to complex exhaust silencers, control valves, major subassemblies and other components, our extensive inventory of parts worldwide is available for immediate shipment. It's our commitment to you.
