

CAT[®] REMAN TURBOCHARGERS

Meet your Cat On-Highway engine's demands and lower your costs

Using the right turbocharger can help ensure maximum engine efficiency and power. And only Cat[®] turbochargers are designed, manufactured, and tested to withstand the extreme conditions inside your Cat On-Highway engine. Caterpillar performs class leading turbocharger qualification tests, including structural, dynamic and durability tests that gauge fuel consumption, response time, torque rise and heat rejection.

Cat Reman turbochargers receive the same validation, testing and warranty as New Caterpillar turbos at a fraction of the price. Additionally Cat Reman turbochargers can be protected with the Cat Component Plus coverage program. As a result, you get a fully warranted, low-cost repair option.

**It's no secret that there are extreme conditions inside your engine.
Cat Reman Turbochargers are built to withstand those conditions while
saving you money and downtime for service.**

Strict remanufacturing processes

- All critical surfaces and dimensions are measured to ensure they meet original performance specifications.
- Quality checks and audits are performed throughout the remanufacturing process.
- Center housings are tested for seal integrity.
- All bearings and seals are replaced to ensure long life and top performance.

Fully warranted, low-cost Repair Options

Available off the shelf to reduce your downtime, Cat Reman Turbochargers and Cartridges are priced at a fraction of the new parts and come with a same-as-new parts warranty.

In addition, you can earn credit toward Cat Reman Turbochargers and Cartridges by exchanging used Cat turbochargers and cartridges (cores). To determine core credit level, we use simple, visual inspections that don't require special tools or disassembly. This allows us to provide an immediate decision on core condition and credit, so you don't have to wait for—or guess—repair costs.

For a limited time, exchange your will-fit turbocharger for core credit

To prove that you get more value when you come back to Cat, your Cat dealer is proud to provide a limited-time exchange offer. When you buy a qualifying Cat Reman Turbocharger, you can exchange your old turbocharger at your Cat dealer, as if it were a genuine Caterpillar product. Offer good through Dec. 31, 2015.

CAT DIESEL ENGINE OIL

protects your turbocharger and engine

The largest percentage of turbocharger failures are oil-related—caused by dirty or contaminated oil. You can help protect your turbocharger and engine from premature failure with Cat Diesel Engine Oil.

- ✓ Excellent soot dispersion provides maximum control of deposits and wear to extend turbocharger and engine life. Less downtime lowers your owning and operating costs.
- ✓ Outstanding oxidation stability protects against undue oil thickening during drain period. (Oil thickening inside the oil drain may force the oil out the turbine and compressor seals.)
- ✓ High detergency level ensures superior engine and turbocharger cleanliness, even at extended oil drain intervals.

We can help you determine the right oil for your engine, or you can refer to your Operation and Maintenance Manual.
