Dear _____,

I am requesting permission to take my _____ class to the Caterpillar Visitors Center on:

Date: _____

Time: _____

for an interactive learning experience. My class would spend 1.5 to 2 hours at the center.

To make the most of our visit and connect the experience back to the classroom, the Caterpillar Visitors Center Education Program provides pre-, onsite, and post-trip learning tools including scavenger hunts and various other worksheets aligned to Math, Science and English/Language Arts Illinois Learning Standards. An Educator Resource Guide is also provided and includes talking points and critical thinking questions for teachers and chaperones to use throughout their visit.

Students begin their experience by taking a virtual ride in the bed of a Cat® 797F Mining Truck. Students will also learn about Caterpillar's rich history and Caterpillar as it is today, climb in several pieces of Cat equipment, learn how Caterpillar uses virtual technology and Immersive Visualization, and will even be able to practice on the same training simulators used to train actual Cat operators. Students can virtually customize a piece of Cat equipment, learn about the variety of careers available at Caterpillar and identify the many industries that Caterpillar serves.

The estimated cost for this field trip is \$ _____ includes excludes transportation.

This estimate is based on admission pricing provided by the Caterpillar Visitors Center:

_____ Students age 12 and under (K-7th grade) – no charge x \$0.00 =	\$ 0.00
_____ Students over age 12 (8th-12th grade) – \$3.00 each =	\$ _____
_____ Adults, chaperones and teachers x \$3.00 each =	\$ _____
_____ Complimentary adults, chaperones, teachers (1 free per every 10 paid students) x \$0.00 =	\$ 0.00
Estimated transportation cost:	\$ _____
Total estimated cost:	\$ _____

Thank you for your time and consideration.

Sincerely,
