

MaK Genuine New and Remanufactured Parts Warranty Period

August 19, 2010

New and remanufactured parts (REMAN) for MaK marine products are normally warranted by the MaK factory (KEC) for a period of twelve months from delivery to customer, according to the General Sale and Delivery Conditions, unless otherwise agreed upon. This warranty covers defects in workmanship and materials only, and excludes any failures or damages that are the result of improper installation, handling, usage, operation, or maintenance.

If a part or component covered by warranty fails within its warranty period, the warranty on its replacement is limited to the remainder of the original period. For example, if a replacement part fails after four months, the warranty period for the new replacement part will be limited to the remaining eight months.

Yours Sincerely,

Calvin Hardiment
