

REPAIR OPTIONS

LONGER LIFE. MAXIMUM VALUE.

// D6

EXTEND YOUR MACHINE LIFE AND PROTECT YOUR BOTTOM LINE.

Every repair situation has its own unique set of challenges. With a broad range of options that match your equipment and application, we can help you save time and money. Repairing components before failure is key to **MAXIMIZING** availability and uptime, while **MINIMIZING** your operating costs. Once a component fails, your choices become limited. When you repair before failure, you can tailor the repair to your specific situation and reduce costs by two to three times the price of after-failure.

Repair before failure:

- Prevents damage to related parts
- Reduces downtime
- Maximizes parts reusability
- Increases machine utilization

WE CAN QUICKLY EVALUATE YOUR SITUATION BY EXPLORING THESE KEY FACTORS:

OWNERSHIP

How long will you continue to own this dozer?

UTILIZATION

How many hours do you typically use this machine?

AFFORDABILITY

What price point would you be comfortable with?

TURNAROUND

What's the turnaround time for your situation?

Based on your answers, we develop a solution that keeps your equipment running and your job moving.

REPAIR, REBUILD OR REPLACE – OUR EXPERIENCE CAN HELP YOU MAKE THE BEST BUSINESS DECISION.

The majority of Cat® components are designed for multiple lives. Our Caterpillar trained technicians have the knowledge and expertise to explain the options and how they will impact your bottom line. Because we know parts and component specifications for your specific equipment, you can count on our team to evaluate whether rebuilt or replacement parts and components offer you the best value. Plus, you have added confidence because Cat parts and service are backed by our 12-month parts warranty.

MORE OPTIONS. MORE ADVANTAGES.

From new parts to complete machine rebuilds and everything in between, we want you to get the quality and reliability you need to stay ahead of your competition. We work together to give you a package of technologies and services that fits the unique challenges of your business.

CAT PARTS

New Cat parts and components are designed to Caterpillar's exacting specifications. They are built for more than one life, so you can get the most value at the lowest possible cost. Cat REMAN parts carry a same-as-new Caterpillar warranty for less than the price of new, so you have even more repair options.

CATERPILLAR WARRANTY & INSURANCE

You can have confidence in Cat parts backed by our 12-month parts warranty. Ask your Cat dealer about additional coverage options. With Equipment Protection Plans you can control costs

CAT FINANCING

No matter where your job takes you, Cat Commercial Account is a quick and easy way to manage costs. For a limited time, special financing terms are available to qualifying customers. Be sure to ask your Cat dealer for more details.

EMSOLUTIONS

Cat EMSolutions puts our knowledge and expertise to work with the latest equipment technologies and services to help you reduce operating costs and get more value from your equipment.

**12-MONTH
PARTS WARRANTY**

DON'T BELIEVE THE MYTHS

MYTH #1

CAT DEALERS ARE ALWAYS THE MOST EXPENSIVE.

Expense is relative to the value of what you receive in return. At a Cat dealer, you receive the highest quality parts and premium service. But they also have lower-cost options. They even have kits available if you choose to do your own repair.

MYTH #2

CAT DEALERS OVER-REPAIR.

Cat dealers are focused on extending machine life and value, so they avoid quick fixes that could lead to greater problems down the road. In that case, they will provide options for repair that can avoid “band-aid” fixes, which can lead to greater costs in the future. However, if you have a shorter-term ownership plan, immediate production needs or other special circumstances, your Cat dealer will help you choose the best value option. That is not over-repairing—that is looking out for your best interest.

GET THE STRAIGHT STORY ON REPAIR OPTIONS

It's easy for myths to take root if you don't have first-hand information to compare. Talk to your Cat dealer and find out for yourself how your dealer can help you operate efficiently as well as extend the life of your equipment.

BUILT FOR IT.

D6

No matter what your situation, we've got the parts and repair options that are right for you, your machine application and your budget. And, because we've got training and experience in reuse and salvage of parts and components, you can be certain that you're getting the greatest value. Take a look at the options available for the Cat® D6.

YOU HAVE OPTIONS

FROM SIMPLE REPAIRS YOU CAN TACKLE TO TOTAL OVERHAULS COMPLETED BY YOUR DEALER

DRIVE TRAIN OPTIONS

- Over-the-counter kits for bearings, seals, gaskets and O-rings
- Over-the-counter final drive and torque converter kits
- Dealer rebuild options

ENGINE OPTIONS

- Precious Metals Kits make do-it-yourself repairs faster and easier. Four levels of kits – BRONZE, SILVER, GOLD AND PLATINUM
- REMAN components and engines
- Dealer rebuild options

UNDERCARRIAGE OPTIONS

Undercarriage is a large percentage of the operating cost of the machine. Whether you're going to hang on to your dozer for a long time or put it up for sale, your Cat dealer has undercarriage choices that will meet your needs.

UC Type	Abrasion	Impact	Moisture	Packing
General Duty	Good	Good	Good	Better
Heavy Duty	Better	Best	Better	Best
SystemOne	Best	Better	Best	Good

CAT CERTIFIED POWERTRAIN REBUILDS

- Restores powertrain to like-new performance
- Critical engineering updates incorporated
- Replacement or reconditioning of approximately 3,000 parts
- Extended powertrain coverage through Cat Insurance

HYDRAULIC OPTIONS

- Over-the-counter hydraulic seal kits
- Hydraulic honing and reseal service
- Dealer rebuild options

CUSTOM TRACK SERVICE

Take full advantage of the long life built into your Cat undercarriage system with Cat Custom Track Service (CTS). CTS is a comprehensive program that manages your undercarriage as a system. Caterpillar trained parts and service specialists will inspect all components to accurately project remaining wear life and schedule maintenance. CTS data speeds track work, so downtime is kept to an absolute minimum. Planned maintenance and managed repairs result in the lowest operating costs per hour.
