D SERIES FEATURES OVERVIEW

- Advanced Display Customisation
- Continuous Flow for Attachments
- Deceleration Pedal
- Dual Self Level
- Visibility to Bucket Edge
- Return to Dig
- Sealed Pressurised Cab
- Front & Rear Exits
- Rear View Camera
- Easy Serviceability Access
- Creep Mode
- Suspended Undercarriage
- Speed Sensitive Ride Control
The Cat® D Series electro-hydraulic system provides precise, responsive and effortless control and is highly customisable to suit operator preference. Built in features such as continuous flow, creep mode, dual self level and return to dig maximise productivity and efficiency.

**ADVANCED DISPLAY CUSTOMISATION**
Optimise your experience through 11 customisable settings including drive train and implement response. Configure up to 50 security codes and view the rear view camera through the display.

**CONTINUOUS FLOW AND CREEP MODE**
Operate hydromechanical attachments with ease by automating continuous hydraulic flow and scaling down the drivetrain speed whilst maintaining full hydraulic power.

**TWO CONTROL OPTIONS**
For the first time Cat will provide a hand and foot control factory option for 14 D Series skid steer, compact track and multi terrain loaders, allowing you to choose your preferred control pattern.

**RETURN TO DIG**
Reduce cycle times by returning the arms and bucket to a pre-set position at the press of a button.

**DUAL SELF LEVEL**
Unlike competitive systems, Cat self level controls the load whilst both lifting and lowering and electronic snubbing slows the loader arms at the end of the cycle, softening harsh stops.
D SERIES COMFORT

Built in comfort features and intelligent control systems allow you to operate at maximum productivity all day in the D Series.

D SERIES CAB
The spacious and ergonomic cab creates a cleaner, quieter environment through a one piece, sealed and pressurised design. Air conditioning and air suspension seat options plus panoramic visibility create the ultimate cab environment.

INTELLIGENT THROTTLE CONTROL AND SMOOTHING
Intelligent throttle control coverts the acceleration pedal into a deceleration pedal at high idle allowing for a smoother ride and better efficiency. Throttle smoothing dampens oscillating foot throttle movement for uneven terrain.

SPEED SENSITIVE RIDE CONTROL
Minimise bob and maximise load retention with speed sensitive ride control. The system automatically engages above an activation speed, pre-set using the advanced display. Lift cylinders act as shock absorbers to provide the industries best ride performance.

AIR RIDE SEAT
Get unparalleled comfort in both cab and open canopy models with the high back, heated, air ride seat. Available in vinyl or cloth, the air ride seat features mounted joysticks for easy adjustment and great ergonomics.
D SERIES SAFETY

Cat® D Series machines have been designed with safety in mind. Unique standard features such as front and rear emergency exits, spring applied hydraulically released brakes, dead engine lowering valve, accumulator, standard back-up alarm, horn, rear view mirror and optional rear view camera make the D Series one of the safest machines to work in and around.

INNOVATIVE LIFT ARM BRACE
The D Series lift arm brace can be installed and uninstalled by just one person and is held in place with a retaining pin.

HYDRAULIC ACCUMULATORS AND DEL LEVER
In the unlikely even of lost engine power, hydraulic accumulators use stored hydraulic energy to lower the lift arms and level the bucket. If electrical power is also lost, a dead engine lower lever will allow arm lowering for safe exit.

VISIBILITY
The D Series provides unmatched visibility from a normal seating position. Clear lines of sight allow the operator to see the bucket edge, coupler and track or wheel edges. A rear view mirror is standard, whilst an optional rear view camera can provide full 360° visibility.
Cat® attachments are designed to pair seamlessly with the D Series skid steer, multi terrain and compact track loaders.

D SERIES SUPPORT & SOLUTIONS

DEALER CAPABILITIES
When you buy Cat® you aren’t just buying a piece of equipment, you are partnering with the industries best, most extensive and always on dealer network. Your Cat dealer will be there for you for the life of your equipment, bringing you the tools, technologies, service and know-how to keep your machine productive.

CAT FINANCIAL
Cat Financial provides the best rates and solutions for your business. Cat Financial offers higher approval rates, flexible down payments and flexible terms to provide higher customer satisfaction. No additional security is required when financing a new Cat machine, CFAL is dedicated to helping Caterpillar customers through good times and bad.

EQUIPMENT PROTECTION PLANS
New Equipment Protection Plans are the only service plan designed specifically for buyers of new Cat machines, providing the highest level of repair cost protection available. Backed by the worldwide resources of Cat Financial Insurance Services, Equipment Protection Plans enhance and sustain your entire ownership experience with comprehensive coverage and peace of mind.
