### TOPIC: How To Recognize Work Zones

Damage or injuries may occur when a worker enters a work zone without informing fellow employees around the area.

#### **Know the Boundaries**

- Recognize patterns in operating systems such as haulage routes, loader cycles and reach of dragline or shovels.
- Know the defined boundaries of work zones. Special attention is needed where the work zones intersect and overlap.

#### Communicate

- Keep track of others in the work zone and let them know where you are at all times.
- Establish eye contact with co-workers before entering their work zone.
- Always establish two-way communication whenever it is necessary to enter a work zone.
- Do not enter another's work zone until the employee active in that zone acknowledges your presence.
- Always inform workers when you leave their work zone.

Mining Safety: How To Recognize Work Zones
