DO MORE WITH ONE MACHINE.

Invest in what you already own — give your machine Cat® attachments and equip it to do more. And because our attachments are engineered, balanced and tested to each Cat model, they promise to minimize stress and optimize performance. Browse our lineup and find the tools to make your work easier.

AUGERS

Bore with better efficiency.

Our augers offer different speed and torque options for work in a variety of soils. We've engineered their speed to extract soil efficiently and their torque to prevent stalling in dense ground. Select from a range of auger bits. See page 12 for details.

BUCKETS

Move more material in less time.

The shape of our buckets improves digging, loading and material retention. Compared to most competition, we have more capacity per every inch of width. And each is made of high-strength, tempered steel. Select from a range of bucket teeth.

COUPLERS

Move quickly from task to task.

Our Dual Lock™ Pin Grabber Couplers allow operators to change attachments in seconds, increasing job efficiency and enabling one machine to do multiple tasks. We offer two, easy-to-use options: hydraulic (controlled from the cab) and mechanical. And all Cat models include primary and secondary locking systems to ensure what you put on your machine, stays on.

HAMMERS

Separate the toughest surfaces.

Our hammers were designed for hard hits, reducing rock and concrete materials. Each features an automatic shut-off and buffering system to reduce machine vibrations. And some of our hammers are fully enclosed to suppress noise.

RIPPERS

Tear up more terrain.

Built to cut through dense dirt, loosen rocky soil and break below the frost layer, Cat rippers are taking on some of the most challenging ground conditions. And because they're made for specific Cat models, they can better transfer machine power into ripping power.

SHEARS

Minimize metal.

Our shears rotate 360 degrees for rapid repositioning and are designed with a straight, lower jaw to improve the cutting force.

THUMBS

Go from digging to material handling.

Our thumbs work with buckets to grab, pick or sort material. They're hydraulically controlled from the cab, opening and closing around loads. And when you don't need it, the thumb can recline against the machine stick.

VIBRATORY PLATE COMPACTORS

Pack with power.

Cover more ground with our vibratory plate compactor’s large surface and pack soil faster with its high-power pulses. We’ve even built in flexible isolators to guard against excessive vibrations.

WORK WITHOUT WORRY.

We back our attachments with a one-year warranty and ongoing Cat dealer support. It’s another way we’re helping protect what you rely on.

GROUND ENGAGING TOOLS (GET)

Choosing the right GET is critical. Each is engineered to maximize machine performance in specific applications, reducing resistance while boring, digging or scraping. Our GET also protect heavy-wear areas, extending attachment life and lowering maintenance costs.

AUGER BITS

Standard Bit

- Factory standard
- For drilling holes with a large diameter

Tree Bit

- Tapered tip
- For drilling holes with a large mouth and narrow base to properly fit a root ball or holes with a small diameter to fill with mulch or fertilizer

Industrial Bit

- Excellent tooth retention while digging
- Allows for easy removal and installation

Standard Rock Drill Head Bit

- Transforms a standard bit into an industrial bit
- For severe ground conditions including rock and various types of concrete
- Bolt-on design for easy removal when returning to normal conditions

Auger bit sizes range from 152 to 914 mm (6 to 36 in) in diameter to a depth of approximately 1270 mm (50 in). Stackable extensions range from 305 to 1829 mm (12 to 72 in) in length and are available to enable deeper drilling.

BUCKET TEETH

Wide

- Low penetration
- Low impact applications
- Use to smooth ground surfaces

Extra Duty

- Moderate penetration
- Use in moderate impact applications
- More wear material

General Duty

- Moderate penetration
- Moderate impact and abrasive conditions

Penetration Plus

- Good penetration
- Moderate to high impact applications

Penetration

- Very good penetration
- Moderate impact and lower abrasive conditions
- Less wear material

Double Spike

- Very good penetration
- Use on fracturable materials
- Install in corner positions with spike centers

Spike

- Excellent penetration
- Use on cohesive materials
- Less wear material
