

Cat[®] 340F UHD

Ultra High Demolition Hydraulic Excavator

A high reach demolition machine designed and manufactured by Caterpillar, distributed through the Cat[®] dealer network, offering the same warranty and unmatched product support as any other Cat products.

Performance

- UHD front parts can reach up to 22 m of vertical pin height, capable of carrying 3.6 tons up to 15 m horizontal reach.
- C9.3 ACERT[™] engine meets EU Stage IV emission standards. Engine speed control automatically lowers rpm when the machine doesn't need it to help you save fuel.
- Auto engine idle shutdown helps reduce fuel consumption.
- Three power modes – high, standard, and eco – and auto engine speed control help manage fuel consumption.

Technology and Safety

- Cat active stability monitoring system continuously informs operator of work tool position within the safe working range, and warns him when approaching the stability limit.
- Standard rearview camera gives a clear view on the monitor.
- Cat Product Link[™] and VisionLink[®] enable owners access to location, hours, fuel consumption, idle time, events, and diagnostic codes.

Versatility

- New boom coupling system enables the operator to easily and quickly install or remove high reach and short front parts. New hydraulic pin system safely locks the front parts together.
- Short boom nose can be positioned in either bent or straight position and can be fitted with three stick lengths options.
- Multiple Cat Work Tools – designed specifically for Cat machines – are available for a wide range of applications.
- Cat quick couplers allow you to switch from one tool to another in a matter of minutes.
- Cat tool control remembers pressures and flows for up to 10 tools so you can quickly get to work after each tool change.

Comfort

- Demolition cab includes P5A reinforced windshield and top glass, with parallel wipers, as well as front and top Falling Object Guards.
- Enlarged top window offers enhanced upwards visibility.
- Cab can be tilted back to offer a more ergonomic operator position in high reach applications.
- Automatic climate control system helps maintain consistent cab temperature.
- Heated and cooled seat options.
- Joysticks and armrests adjust for operator preference.
- LCD monitor programmable in 42 languages.

Serviceability

- Mesh screens are fitted on side doors to prevent radiators clogging.
- Easy diagnostics and fluids quality monitoring are done thanks to S-O-SSM sampling ports for the hydraulic system, engine oil and coolant.
- Hydraulic oil and engine oil can be fast drained thanks to the QuickEvac[™] drains located in pump compartment.
- Routine maintenance items like grease points, fluid taps, filters, and drain tubes can be reached at ground level. Safe access with ample handrails, anti-skid plate on steps and top deck platform.

Durability

- Structures are purpose built for long service life in demolition applications.
- Track shoes, links, rollers, idlers, and final drives are built with high-tensile strength steel.
- Grease-lubricated track link prevents dirt and debris from entering.
