

G3600 with ADEM 4™ (A4) technology

More than
12% Increase in horsepower

The Game Changer for Gas Compression

G3600 engines with ADEM 4 (A4) provide increased power rating, fuel flexibility and greater altitude capability, lower emissions and ultimately lower owning and operating costs.

● ● ● The Cat G3600 engine family has logged over 150 million operating hours globally.

Ambient Rating Capability = Higher Output.

A4 control system dynamically allows the engine to provide greater horsepower at lower ambient temperature. The colder it gets, the more horsepower you get.

Greater Fuel Tolerance

- Full rated horsepower up to 1550 BTU.
- No fuel conditioning needed.
- Runs up to 2300 BTU at 50% derate.

40%

NOx Emissions Reduction

Emissions breakthrough for engine across all operating conditions

The lifecycle of the 3606 is beating our expectations. We're seeing ten years before overhaul. It's just a good dependable engine. It's been a key component to the success of CDM.

CDM Resource Management LLC

Advanced Condition Monitoring

Eliminate Unexpected Downtime

Minimize Owning & Operating Costs

Extend Component Service Life

Improved Operating Efficiencies

Cost Effective Corrections

Data Driven Decisions

Optimize Uptime

Productivity Optimizer

allows customers to optimize their entire fleet remotely.
