

# Perkins in India

 **Perkins**<sup>®</sup>

THE HEART OF EVERY GREAT MACHINE

# Working together to supply reliable power solutions

Our customers empower us to deliver high quality products and services.

The success of our customer relationships is down to the collaborative approach we like to use as we work with you to understand your challenges and requirements. By sharing our respective expertise and know-how, we deliver leading power solutions to thousands of people.

## Quality and reliability

Whatever demands you place on your generator set, you can rest assured that a Perkins engine will deliver the reliable performance you need.

Whether you need your generator set to work at prime, continuous or standby operation or whether it is destined for domestic or export use, you can rest assured that wherever it is located, your Perkins engine has the quality and reliability that will give you the power you need, when you need it.

It is estimated that India will have the world's largest population by 2030; expanding prosperity across the population will increase the demand for energy.

# Electrical power generation at its **best**

Aurangabad facility

Our new state-of-the-art facility in Aurangabad, Maharashtra, manufactures and supplies the complete Perkins® 4000 Series engine range.

The facility has the capacity to produce 3,000 engines per annum, with a long term vision to 5,000 engines, supporting the power generation market from 750 to 2500 kVA.

With the addition of our latest manufacturing facility in Hosur, producing 1100 Series engines, Perkins is truly manufacturing closer to our Asian customers. Using our world-class Indian supply base, we will be able to provide customers with the engine they need, tailored to their specific requirements providing reliable power solutions for hospitals, airports, universities, real estate, data centres and large manufacturing industries.

None of this growth and development would be possible without our people. They are selected for their motivation, diverse expertise and sharp customer focus. Add these valued competencies to their knowledge of India's markets and culture and our teams in India will always go that extra mile to ensure your expectations are met and you enjoy a successful partnership with us.

**Our range of engines for the electrical power generation market hit all the key power nodes for prime and standby power in the 5-2500 kVA (4-2000 kWe) power band.**

- Our range of small, medium and large diesel engines consistently deliver exceptional performance, reliability, durability and low operating costs. They are available to you as standalone models or ready-to-run ElectropaKs.
- Our ultra-efficient combined heat and power (CHP) spark-ignited gas engines for stationary on-site power generation are robust and flexible. Running on 100% natural gas or alternatives, such as bio or anaerobic digester (AD) gas, they offer you long-lasting power and low cost.
- Some models are switchable from 50 Hz to 60 Hz systems.
- Models designed to meet global emissions standards.
- Engines come with 12 months warranty and 500 hour service intervals as standard. Warranty is two-years/6,000 hours or one-year unlimited for prime power application in 4000 Series.

**Small range engines:**  
400 Series

2, 3 and 4 cylinder engines  
5-40 kVA (4-32 kWe)

Excellent access for easy servicing  
Economical operation superb power to weight ratio  
Best in class prime power warranty

**Medium range engines:**  
1100 Series and 1200 Series

3, 4 and 6 cylinder engines  
30-250 kVA (24-200 kWe)

Meets global emissions standards  
Competitive total cost of ownership  
Accessible, expert product support delivered by our distributor network

**Large range engines:**  
1500 Series, 2000 Series and 4000 Series

6, 8, 12 and 16 cylinder engines  
200-2500 kVA (160-2000 kWe)

Wherever you are in the world, you are always local to Perkins

To all our customers we make a simple promise: to keep your engines running wherever they are in the world.

This promise is delivered by our highly trained network of distributors who operate in over 180 countries. You are never far away from expert product knowledge, genuine parts and a range of advanced diagnostic technology for keeping your engine in peak condition.

#### Close to our customers in India

Our two distribution partners in India - Gmmco Power and Powerparts Private Limited share a commitment to deliver the highest standards of support to our customers.

They have an in-depth knowledge of power generation in their territories and understand the environment, local legislation and reliability of the power grid. In short, they know what works – and what doesn't – in your region.

With a network that has one certified engineer for every ten engines installed, you can always count on us to provide the support you need, when you need it.

# You can always count on us
