

BUILT FOR IT.

Rental power you can count on.

- Scheduled power shutdowns
- Remote locations or sites
- New or expanded facilities
- Seasonal peak load needs
- Unscheduled downtime on equipment

WHETHER OR NOT THE OUTAGE WAS EXPECTED, WE'RE HERE TO KEEP YOUR OPERATION RUNNING.

From planned events to unplanned power outages, having a temporary power plan in place is critical to ensuring the power you need is there when you need it. Cat® Rental Power and the global network of Cat dealers are always ready to get you set up and running quickly with the largest fleet of generator sets and ancillary equipment. Plus, we have more than 1,600 worldwide locations to support you along the way.

LOOK FOR CAT RENTAL POWER HARD AT WORK AROUND THE GLOBE.

THE PERMANENT SOLUTION TO YOUR TEMPORARY POWER NEEDS.

Complete Solutions

Single-source access to all product and accessory needs, including continuous power systems, cooling systems and air compressors.

Support

Experts available every step of the way to assist you in designing a system, delivering equipment, providing technical support, service, maintenance and training programs for rental projects.

Response

Supported by our network of rental power experts in the field, we can immediately outfit your system, deliver it (with all the ancillary equipment included), provide the connection, fuel, start-up, service and maintenance, and can remain on-site to provide support when necessary.

Environmental Considerations

Our units are engineered to produce lower gas/diesel emissions and meet or exceed local emissions standards, and we offer options such as sound attenuation for sensitive environments. All units come with standard fuel containment.

POWER GENERATION

From well drilling to mine power to manufacturing, Caterpillar consistently delivers clean, reliable, fuel efficient Cat Rental Power generator sets. For start-up, planned shutdowns and emergencies, no matter your industry or need, Caterpillar is the answer for temporary power.

Cat Rental Power equipment is sound-attenuated, self-contained and easily transportable, designed for quick connection and fast, easy service.

Emergencies happen. While you never know when they'll occur, you can prepare for them. It's smart for any business to take steps ahead of time to ensure you're not caught when a disaster strikes. Rely on your Cat dealer to stay ahead of any crisis and to make certain you have a plan in place to install and deploy equipment quickly and efficiently. They'll help you analyze your specific loads to keep your operation going through any disruption.

Because a major storm or flood can result in severe damage, it is wise to plan for scenarios in which even backup power systems fail. Rental power equipment should be sized in the same manner as permanent backup power. Other considerations for each facility include:

LOCATION Space must be available for parking the rental generator set outside buildings. If a facility has a large power requirement but lacks space to install a large power module (up to 8 feet wide by 40 feet long — or 2.5 meters wide by 12 meters long), two or more smaller units will perform just as efficiently.

ACCESSORY REQUIREMENTS Cable is necessary to connect the generator sets to the building's electrical system. Transformers, load banks, bus bars, distribution panels, feeder plants, fuses, outlets, load centers and other accessories may also be necessary.

FUEL REQUIREMENTS During an emergency, fuel supplies and delivery may be sporadic. A fuel tank with capacity for at least 24 hours of runtime is advisable.

STAFFING REQUIREMENTS If on-staff personnel are not experienced with power generation equipment, it is necessary to arrange for professional assistance to install and operate the rental generator sets.

NO MATTER WHERE YOU ARE, THERE'S WORLDWIDE SUPPORT JUST AROUND THE CORNER.

Even in the most challenging situations, the global Caterpillar team of 1,600 locations is right there with you. They will work with you to be sure you have the diverse fleet and quick response support required — for both immediate and long-term power needs. Our skilled team is ready to assess all aspects of your temporary power needs. They can help you by designing a system to comply with safety and code requirements, delivering and installing equipment, providing technical support, and servicing and maintaining your rental projects.

Count on Caterpillar every step of the way. We'll take care of the equipment so you can focus on your business.
