

Cat® Cabin Air Filters

A cleaner, more comfortable cab

Caterpillar offers optional cabin air filters for use in most applications and environments. All cabin air filters meet Caterpillar's stringent specifications for performance and quality construction. Advanced filtration technology reduces airborne irritants, creating a cleaner and more comfortable working environment for the operator.

Standard Efficiency

- » Recommended for most normal-duty filtration applications
- » Designed to prevent dirt, soot, sand and other contaminants from entering the cab under normal operating conditions

High Efficiency

- » Recommended for extremely dusty environments
- » Improved dirt holding capacity, which may extend service life depending on the operating conditions
- » Higher initial and overall efficiency for improved performance

Lower Restriction

- » Recommended in situations where there is poor cab air flow
- » Allows for more air flow into the cab
- » Slightly lower capacity and efficiency than standard

Activated Carbon Odor Reduction

- » Recommended in situations where odor is a problem
- » Absorbs odors as well as captures dust
- » High performance activated carbon ensures fast rate of absorption
- » Superior particle removal efficiency reduces eye, nose and throat irritants

No equipment modification is needed for installation. See reference chart »

Upgrade Cabin Air Filter Options

UPGRADE TYPE	STANDARD	UPGRADE OPTION	STANDARD	UPGRADE OPTION
Activated Carbon	105-4968	139-3204	290-2287*	348-3432

Lower Restriction	119-3355	268-6704	259-3222	266-7765
	209-8217	268-6705		

*Low Restriction

Activated Carbon cabin air filters will experience shorter life in dust only applications.

Cabin air filters are not for use in filtering hazardous materials.

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.
