

# MOBILE POWER UNITS STATE OIL COMPANY CORPOELEC

OWNER  
**Corpoelec**

LOCATION  
**Venezuela, South America**

PRODUCT  
**Titan™ 130 Mobile Power Units**

CUSTOMER VALUE  
**15 MW Blocks of Stable and Reliable Power**

In 2010, a severe drought in Venezuela threatened to severely curtail the production of hydroelectric power, which normally provides 65% of the country's electricity. The need for replacement power was intimidating – nearly a gigawatt of continuous duty power, preferably in distributable 45 MW blocks. Corpoelec, a subsidiary of Venezuela's national oil company, turned to Solar Turbines and their 15 MW gas turbine Titan 130 mobile power unit (MPU). Solar was able to ship the units in the required time and satisfy the customer's needs for having emergency power placed and available should they need it.

## Mobile Power Units – State Oil Company

### PLANT DATA

16 Gas Turbine Generator Sets in Mobile Configuration

Fuel: Natural Gas and Diesel Fuel

Varied Locations Throughout Venezuela

### OUR PRODUCTS AND SERVICES

16 - 15 MWe Titan 130 Mobile Power Units

Three Trailers per Titan 130 Mobile Power Unit

On-Site Setup Time of a Few Days

**HIGHWAY TRANSPORTABLE**

**EASY TO INSTALL AND RELOCATE**

**NO CONCRETE FOUNDATION REQUIRED**

**COMPACT FOOTPRINT**

**PLUG-AND-PLAY PRE-PACKAGED DESIGN**

**SHORT ORDER, CONSTRUCTION, AND COMMISSIONING LEAD TIME**

The Solar Turbines MPU is a complete power plant solution that offers a suite of modular options that include natural gas, liquid, and dual fuel designs. In addition, switchgear and the motor control center are standard equipment, making the installation a simple matter of locating the equipment and connecting it together. The MPU's trailerized modules arrive on site ready to be piped, wired, and commissioned in a time span much shorter than the typical custom power plant design cycle. The compact footprint allows for installation in tight areas such as utility substations or industrial backlots. Designed as a complete power plant, the Titan 130 MPUs are highway transportable, provide easy access for customer connections, require no concrete foundation, have a compact footprint, and offer low emissions options.
