

Track Removal

Progress Rail Services mobile take up crews are ready to put their expertise to work retiring abandoned track or cleaning up the right of way behind your steel gang. Our fleet of on-track trucks is equipped with reverser boxes enabling full speed reverse movements, and are capable of pulling loaded cars. Whether its 1 mile or 100 miles, we have the crews and equipment to get the job done quickly and safely.

Rail & OTM Sorting

Don't throw your money away! The Rail & OTM laying around is not doing any good just sitting there. Call us and we can show you how to maximize the value of your Rail & OTM.

Progress Rail Services offers creative ways to maximize the value of your material. We have the equipment and experience to either sort on site or bring the material to our sorting facility. There, we have the capability to unload, sort, inspect and grade your material to current industry standards. In addition, we have the ability to Ultrasonically Test (UT) your relay rail to make sure there are no defects going back into track.

Relay/Used Material

Whether your requirement is for Rail & OTM, complete turnout packages or a single trackwork component, Progress Rail Services facilities can fill your requirements. Our inspectors grade used Rail & OTM to a strenuous industry standard to make sure you get a quality product. Our extensive trackwork experience and re-manufacturing capabilities enable us to provide trackwork to your specification and quality.

Regardless of your requirements; new or relay, you can expect the quality and quick turnaround between order and jobsite delivery that sets us apart from the competition.

In addition, we also purchase or trade for your surplus inventory such as rail, plates, frogs, points and switch stands.
