

Dependable  
**power solutions** for India's  
hospitality sector

 **Perkins**<sup>®</sup>

THE HEART OF EVERY GREAT MACHINE

Investing in India

# providing you with the power to perform

You are providing hospitality services every minute of every day for a discerning clientele who are expecting none other than a relaxing stay. A loss in power will cause a multitude of problems, leading to reputation damage and ultimately a loss in revenue.

At Perkins we recognise how vital it is that the generator set you use is of outstanding quality and reliability. That is why we have been working in India for the last 30 years to provide you with the perfect power solution. You cannot always rely on the Indian power network but with a Perkins engine inside you will be leaving nothing to chance.

These are exciting times for the hospitality sector, and we are delighted that there has been unprecedented Foreign Direct Investment of US \$7,441 million in the last fourteen years. This vibrant market is now worth US \$38 billion, expanding at a rate of 10% year on year.

Recognising this serious economic expansion and the need for your continued productivity, we have invested US \$150 million in a state-of-the-art engine manufacturing plant in Aurangabad, Maharashtra. It is a commitment to India. And a commitment to you.

The highly successful Perkins® 4000 Series will be produced at this world-class facility, adding to the 40,000 that are already powering machines around the globe.

This allows us to continually support the electrical power needs of the hospitality sector. Whatever demands are placed on a generator set, whether it operates at prime, continuous or standby, a Perkins engine has the quality and reliability to give your customers the power they need, when they need it.

# Choose the **perfect power solution** for your **generator set**

Our 2000 and 4000 Series of engines are designed to consistently deliver exceptional performance, durability and low operating costs for power generation to the hospitality industry. Their excellent reliability and uptime can be verified through historical data, and coupled with a competitive first price and unparalleled customer support, it makes a Perkins powered generator set the best choice every time.

## Enjoy peace of mind with our warranties

Our reputation is built on trust and reliability, which is why we provide one-year unlimited warranties on our 2000 Series and two-year / 6,000-hour warranties for prime application on our 4000 Series.

These are supported by Perkins Platinum Protection, the best extended cover for your engine. Offering you flexible packages between two and ten years, it's unbeatable value for money with no excess to pay. Stay protected with Perkins Platinum Protection.

## We have India covered

Our two distribution partners in India - Gmmco Power and Powerparts Private Limited share a commitment to deliver the highest standards of support to our customers.

They have an in-depth knowledge of power generation in their territories and understand the environment, local legislation and reliability of the power grid. In short, they know what works – and what does not – in your region.

This network has one certified engineer for every ten engines installed, so you can always count on us to provide the support you need, wherever you need it.

## 2000 Series

**Overview:** Developed from a proven heavy-duty industrial engine, the 2000 Series of turbocharged charge cooled in-line 6 cylinder engines offer exceptional performance and fuel consumption in an ultra-compact package.

**Power:** 350 to 625 kVA

**Capacity:** 13, 15 and 18 litre

**Emissions:** Meets global and Indian emissions standards

**Perkins powered generator sets are the perfect choice for the Indian hospitality industry, due to these outstanding features:**

- Competitive total cost of ownership
- Exceptional power-to-weight ratio and compact size gives optimum power density
- Accessible, expert product support delivered by our distributor network
- Excellent service access for ease of maintenance emissions and minimum heat rejection
- Capability to run at high altitude and up to 50°C ambient temperature
- 500 hours oil change interval
- Platform commonality
- Increased fuel tolerance for alternative fuels
- Full authority electronics continuously measure engine performance, providing excellent fuel consumption and service information for engine protection

## 4000 Series

**Overview:** Reliable, durable and economical 6, 8, 12 and 16 cylinder diesel engines with proven technology, exceptional power to weight ratio, improved fuel efficiency and easy service access.

**Power:** 750 to 2250 kVA

**Capacity:** 23 to 61 litre

**Emissions:** Meets global and Indian emissions standards

**Perkins powered generator sets are the perfect choice for the Indian hospitality industry, due to these outstanding features:**

- Excellent load acceptance leading to up to 73% quick load stabilization (cold)
- Ultra-compact size ensuring smaller machine footprint
- Accessible, expert product support delivered by our distributor network
- Competitive total cost of ownership
- Economical operation with market leading power density
- Capability to run at high altitude and up to 50°C ambient temperature
- 500 hours oil change interval (250 hours recommended for 750 kVA node with CPCB II emission norms)
- Commonality of parts (common bore and stroke, 160 x 190 mm, for 4006 / 4008 / 4012 and 4016 engines) leading to reduced operating costs
- Competitive fuel consumption for both standby and prime applications

# Meeting India's demand for **dependable power**

## You can always count on us

To all our customers we make a simple promise: to keep your engines running wherever they are in the India.

You are never far away from expert product knowledge, genuine parts and a range of advanced diagnostic technology for keeping your engine in peak condition.

Your needs are our number one priority and by working together we guarantee you will have the engines and options that perfectly match your requirements. We ensure:

- World class design and manufacturing
- Collaboration with engine experts
- Sustainable, clean engines meeting applicable emissions standards
- Competitive offering
- Distributor network that provides full product support

Our reputation for excellence and an unrivalled global support network will give you the strength and confidence to attract and retain customers, growing your business well into the future.

We have been working in India for more than 30 years to support your power solutions needs. Our products are the engines of choice for the City Centre Mall in Haldia, West Bengal and the Kumar Pacific Mall in Pune, Maharashtra.

We have over 85 years heritage in which we have produced more than 20 million engines worldwide, developing a global reputation that has been built on the trust we have earned from our customers. Our success is based on a collaborative approach as we work with you to understand your challenges and requirements.

By sharing our expertise we continue to deliver world-class power solutions that support the growth of India's economy and sustain the hospitality industry's increasing demand for energy.
