

Replacement engine solutions **that meet your needs**

Perkins offers a complete range of engine replacement options that help to drive greater value from your machine

 **Perkins**[®]

THE HEART OF EVERY GREAT MACHINE

Re-engineered for you

For many years Perkins has delivered tailored engine overhaul services designed to extend the life of your machine and deliver a better return on your investment.

In order to support your needs today, we have re-engineered and expanded our offering to provide the industry's most complete range of remanufactured and replacement engine solutions that are now more cost-effective and more readily available, no matter where in the world you are.

Maximise Machine Return On Investment

Our services are focused on helping you to drive greater value from your machine. Covering everything from a new complete head to a new complete engine, you can minimise downtime following in-field failures with more flexible overhaul options and shorter lead times than ever before.

Furthermore, with as-new performance, genuine Perkins parts and factory-standard warranties, our remanufactured and replacement engine solutions also help to extend the residual worth of your machine when you decide it's time to sell.

A complete range of engine replacement options

New Complete Replacement

Perkins now offers off-the-shelf, new complete replacement engines on select models (with a minimum 12 months' warranty) as a drop-in solution that helps you to meet emissions standards, minimise downtime and reduce labour costs.

New Short Engines and Reman Short Engines

Our new short engines are an economical repair option with minimal downtime, delivering a fast, dependable solution for major seizures on most types of Perkins engine. Our reman short engine options are also built to the same high specifications as new, with the same guaranteed quality and warranty but at a fraction of the price if you exchange the core.

New Long Engines and Reman Long Engines

As a cost-effective alternative to a complete replacement engine, our new long engines are built to a design specification that provides flexibility and value for customers requiring a re-power. Simply add ancillaries to restore to full engine build and factory-standard engine performance, and benefit from full warranties and by meeting emissions standards. Our reman long engine alternative options can offer even greater value through exchanging the existing engine core.

New Complete Head

If the engine cylinder head has become warped or damaged but the rest of the engine is in good condition, our new complete head replacement solution provides a quick and highly cost-effective option to return an engine to full working order.

Dedicated support for all your needs

Perkins is even able to support you with out-of-production engines and those made by competitors, and we have robust processes in place to ensure every replacement engine – new or remanufactured – meets each territory's emissions standards.

For us, quality is always a priority, which is why we use the latest technologies for remanufacturing engines to bring the core back to its original OEM specification and to ensure they are as good as new.

Not only does this guarantee the engine performance and reliability you need, but by saving energy and resources it also helps you to run a more environmentally-friendly operation.

- Replacement and remanufactured engine options for every need and budget
- Like-for-like engine performance at a fraction of the cost of a new machine
- Streamlined service and availability (5-7 days maximum for major components)
- Better machine lifecycle management
- Minimal downtime following in-field failures
- Core engine tracking and refunds to meet emissions standards
- A more environmentally-friendly solution

Extended protection for your engine

Perkins Platinum Protection

As the most flexible cover for your Perkins engine (including new replacement engines), Perkins Platinum Protection allows you to extend the standard warranty for 2 to 10 years – with no excess to pay – even if you are using your engine in a harsh environment*.

Our global network of trained technicians guarantees a trustworthy and reliable service, only using Perkins genuine parts, which are rated and tested specifically for your engine and territory. You even have the option to transfer cover between users, allowing you to add extra value to your machine at the point of resale.

Perkins Diesel Engine Oil

Designed specifically to protect Perkins engines, our uniquely formulated Diesel Engine Oil ensures lower running costs with increased engine efficiency and longevity.

Tested beyond industry standards to ensure exceptional results, our oil performs flawlessly under sustained pressure. This helps to reduce wear and prevent issues such as piston ring and cylinder damage, as well as to keep your engine operating within strict emissions standards and regulations.

Perkins Extended Life Coolant

Perkins Extended Life Coolant provides better protection for your engine and reduces costs by up to 50% compared to standard coolant products.

Developed, tested and approved by our engineering specialists, our Extended Life Coolant lasts at least twice as long as conventional coolants in Perkins engines. It comes ready mixed with the right balance of antifreeze and water and requires no additional supplement additives. Fully recyclable, our coolant is also a greener alternative and helps to reduce disposal costs.

* Terms and conditions apply

“Perkins is the only manufacturer with a full range replacement engine programme. Not only does this give customers a cost-effective alternative to buying new or trying to repair, but it demonstrates how Perkins supports the entire lifecycle of their equipment.”

Darin Schultz, Sales Manager, Perkins Pacific

Perkins is trusted worldwide for absolute quality and dependability, which is why all our services include 100% Perkins parts and standard factory warranties.
