

ADVANCED FLEET MANAGEMENT FOR ANY SIZE OR TYPE OF OPERATION.

STAY IN TOUCH WITH ESSENTIAL SITE INFORMATION ANYWHERE.

Cat® Fleet gives pit supervisors in-depth insights into all facets of mine operations, no matter where they are on the site. The system is super portable, easy to use and light on bandwidth. Machines store data and forward it at wireless hot spots, eliminating the need for sitewide broadband coverage. Because it requires only a basic WiFi connection, it's especially good for mines that need to start small and add capabilities as their needs evolve.

BENEFITS

ENABLE better, faster decision making with up-to-the second information.

IMPROVE productivity, utilization, safety and whole-fleet performance.

SAVE money on data infrastructure with low-bandwidth, cloud-based operation.

MANAGE whole fleets, equipment groups, individual machines and operators.

MONITOR fleet and site information using your mobile tablet device.

TRACK machine locations, alerts, job progress and operator activities in real time.

MEASURE

CHECK progress toward daily production goals during the shift, not just after.

GET vital machine information automatically, without time-consuming paperwork, data gaps or chances for human error.

TRACK machine locations, machine speeds, payloads, fault codes and more in real time.

MANAGE

IDENTIFY production bottlenecks, machine issues and on-site trouble spots quickly to enable immediate adjustments.

GET timely facts on key cost drivers, including operator assignments, breaks and shift changes, fuel usage, machine idle time and more.

FIND machines and operators easily anywhere on the site when reallocation is required.

MAXIMIZE

OPTIMIZE your operation through effective short-term interval control

FACILITATE better, faster decision making based on accurate, real-time information.

MAKE more effective use of every supervisor hour spent in the pit.
