

# COMMAND FOR DOZING

## BUILD EFFICIENCY AND ENHANCE SAFETY WITH DOZING AUTOMATION.

Running a large dozer on a mine site is a demanding job. Cat® Command for dozing improves operator safety and efficiency by taking them off of their machines and letting them work from either nearby or remote locations. Deep integration with Cat machine systems enables smooth, precise control for maximum efficiency and productivity.

### FEATURES

- **Portable Console** – Complete control in a compact, over-the-shoulder console. Works well for short-duration activities like cleaning up under highwalls or stabilizing slides. Years of proven performance on mine sites worldwide.
- **Remote Operator Station** – Enables the operator to work from a comfortable, seated position with familiar dozer controls. An optional Vision system incorporates four high-definition dozer-mounted cameras and a microphone, giving the operator a complete picture of the machine's working environment for safe, productive operation in a wide range of site conditions.
- **Semi-Autonomous Operation** – Allows a single operator to manage up to four machines in push-to-an-edge applications. Helps to maximize dozing efficiencies while reducing site operating costs.

### BENEFITS

**PROTECT** operators from on-site dangers and environmental hazards.

**APPLY** geo-fencing and avoidance zone capabilities from Cat Terrain.

**ELIMINATE** prolonged exposure to noise, dust and vibration.

**ENABLE** operations from a comfortable off-site command center close to home.

**IMPROVE** equipment utilization and shift-long operator efficiency.

**CHOOSE** from a range of Command for dozing offerings to fit the needs of your site and applications.
