

CAT[®] TERRAIN FOR DRILLING

4 REASONS NEW CAT[®] TERRAIN FOR DRILLING UPGRADES WILL SAVE YOU TIME & MONEY

You already know how Cat[®] Terrain for drilling can help you plan your work, then work your plan more efficiently. The latest upgrade delivers even more to help you hit your targets every time. Check out four new features that will save you time and money.

1

VISUALIZE PROGRESS VS. PLAN IN REAL TIME ACROSS YOUR DRILL FLEET

Real-time hole updates let multiple drills on the same pattern share the status of every hole drilled. That means your drills and your office all stay synchronized. Everyone sees the same clear visual of progress and accuracy against plan for the entire pattern, so there's no work overlap.

2

TRAIN YOUR OPERATORS MORE QUICKLY & SAFELY

Getting operators up to speed is faster, safer and more cost-effective, thanks to a new simulator that lets you conduct training off the machine. It's a great way to train new operators or help current operators improve their skills.

3

ELIMINATE START-UP INACCURACIES

If you operate Atlas Copco SmartROC D65 or FlexiROC D65 articulated drills, you can stop worrying about inaccurate guidance caused by operator error. The Atlas Copco Hole Navigation System requires a specific start-up procedure to set the machine's orientation. The Cat Guidance System does not. In fact, it eliminates the need for the operator to input basic parameters, taking human mistakes out of the equation.

4

WORK MORE ACCURATELY IN LEACH PAD APPLICATIONS

Now you can add Cat Terrain for drilling to your Wick Hole drills, making it easier than ever to get the leaching agent to percolate through the leach pad and extract valuable commodities. Take advantage of all the key Cat Terrain for drilling features: pattern design files, drilled hole location reporting, bootleg locations, position awareness and guidance.

2 WAYS TO SAVE

For a limited time, we're offering two special promotions to make upgrading to the latest Cat Terrain for drilling even more affordable.

LOW
