

# CAT® TERRAIN FOR GRADING

## 3 CAT® TERRAIN FOR GRADING UPGRADES THAT HELP YOU GET MORE OUT OF YOUR OPERATION

You already know how Cat® Terrain for grading can help you plan your work, then work your plan more efficiently. The latest upgrade offers even more to help you hit your targets every time. Check out three new features designed to help you and your operators get the most out of every machine.

1

### AUTOMATIC BLADE CONTROL CAN MAKE ANY OPERATOR A ROCK STAR

Get safety, productivity and operating costs moving in the right direction with full automatics, full blade load and overcut protection integrated into the machine control system on D10T2 and D11T dozers. These tools reduce fatigue and help new or average operators perform like pros—speeding up the work, decreasing fuel burn, reducing damage to infrastructure and minimizing overcut, overfill and rehandling. Also, with less need for surveyors on the ground, you can improve safety and assign workers to other revenue-generating tasks.

2

### AUTO DELAY & FORCED ACTIVITY LET YOU SEE EXACTLY WHEN AND WHY MACHINES ARE UNDER-UTILIZED

Improve efficiency by getting a better handle on effective machine utilization. New Auto Delay and Forced Activity features give you a clear visual representation of exactly what your equipment is doing and when delays occur—by machine and by operator. You'll know when equipment is being under-utilized and why, so you can make changes to improve productivity and lower costs. Studies show that monitoring machine and operator activity can lead to utilization improvements of as much as 30%.

3

### PROXIMITY AWARENESS AUTOMATICALLY SOUNDS AN ALERT WHEN DANGER APPROACHES

Take safety to the next level with the new Proximity Awareness system, a step up from standard Position Awareness. This onboard system alerts operators when other machines enter their work zones or when machine travel paths may cross. Better still, it doesn't require an additional display, so operators only need to look in one place for all their grading and safety information.

# 2 WAYS TO SAVE

For a limited time, we're offering two special promotions to make upgrading to the latest Cat Terrain for drilling even more affordable.

LOW  
UPFRONT  
COSTS

SAVE  
**24-28%**  
OFF THE  
STANDARD PRICE

when you upgrade now—and  
get credit for your next display  
if you're within 24 months of the  
next upgrade.

NO  
UPFRONT  
COST

UPGRADE  
**NOW**  
AT NO COST

and pay a low monthly fee to keep  
your hardware and software current.  
You'll also get warranty protection on  
parts for the life of your contract.
