

GET TO KNOW YOUR HISTORY

ACCESS ALL OF YOUR DATA WITH CAT® AI HISTORIAN

What if you could tap into all of the data history for your vessel and let its knowledge improve your business?

The truth is, you can. With Cat AI (Asset Intelligence) Historian you will gain deeper access to your vessels history. Cat AI Historian captures all of the data, all of the time, and puts it into an accessible structure for combining, comparing, contextualizing and extracting the data you need. In many ways, Cat AI Historian functions as a search engine across years of your raw data. Search across all your assets, tag names, descriptions and displays and allow stakeholders to quickly locate the needed data. And for those that wish to apply automated analytics to that data to transform it into actionable information, combine it with Cat® Asset Intelligence.

You can't change your past operations, but with Cat AI Historian, you will be able to utilize your past data to change the future.
