CONSTRUCTION & PAVING ATTACHMENTS
MAKE THE MOST OUT OF YOUR MACHINE.
Cat® Skid Steer Loaders, Multi Terrain Loaders, Compact Track Loaders, Compact Wheel Loaders, Backhoe Loaders, Small Wheel Loaders, Mini Excavators and Telehandlers

For more information, visit Cat.com/attachments or contact your local Cat dealer.
TOUGH WORK DEMANDS VERSATILITY.
Attachments to tackle every task on your site.

Cat® machines are built with you in mind – helping you reduce owning and operating costs across various tasks. That’s why we offer an extensive portfolio of attachment solutions that provide versatility, so you can achieve more with leaner crews and keep jobs on time and within budget. Browse our lineup and find the tools you need to get work done faster than ever before.
ANGLE AND DOZER BLADES

Grade and prep ground regardless of gravel or soil type. Our angle and dozer blades are designed to deliver maximum moving power and can be easily adjusted while working.

SSL: Skid Steer Loader
CTL: Compact Track Loader
CWL: Compact Wheel Loader
MTL: Multi Terrain Loader

EASILY ADJUSTS
Changes to blade pitch and angle can be made from inside the cab.

LONG-LASTING MATERIALS
Pins and hardware are plated for corrosion protection.

ADVANCED MOLDBOARD
With a curved moldboard, our blades can maneuver close to any barrier at any angle.

WINTER WEATHER READY
Optional snow kit with heavy-duty guard assembly allows the blade to work year round.
ANGLE BROOMS

Our angle brooms are designed to carefully remove snow — brushing surfaces rather than scraping. Select from hydraulic and manual angling models.

- **ADDED PROTECTION**
  Hood helps direct snow and debris away from the machine.

- **SUPERIOR SUSPENSION**
  Unique suspension system eliminates the need for support wheels and ensures the bristles maintain a constant ground pressure.

- **GREATER DURABILITY**
  Bristles are a combination of polypropylene and wire for greater durability and an extended broom life.

- **SIMPLE STORAGE**
  Four heavy-duty skid type stands make it easy to store the broom apart from the machine without damaging the bristles.

- **MORE MOTION**
  Our brooms can sweep straight or rotate 30 degrees to the left or right.

*Requires high flow option on machine. Operates in standard flow on high flow XPS or XHP machines.

**Requires high flow or high flow XPS option on machine. Operates in high flow XPS on XHP machines.

***Requires high flow XPS option on machine. Operates in high flow XPS on XHP machines.

- **MAX-PRO GAUGE**: Color-coded gauge indicates when cold planer is running at optimal load for maximum productivity.
- **INDICATORS**: Large gauges display current position of independent skid shoe depth.
- **INDEPENDENT SKID SHOES**: Independently controls left and right sides to place shoe on curb and cut surface.
- **HYDRAULIC SIDE SHIFT**: Allows planning close to curbs.
- **SELF-LEVELING TECHNOLOGY**: Self-leveling shoes match the ground, despite coupler position, for easier operation.
FORKS

Our pallet forks were specifically designed to transport palletized items in less time. Our utility forks are ideal for pierceable materials like debris and other waste. Optional grapples improve material retention so work is always neat and always efficient.

MORE OPTIONS

Multiple tine lengths available to match the job at hand.

BETTER VIEW

Excellent load visibility makes it easier to pick up and place pallets.

EASILY ADJUSTS

Notched rail-type carriage design on skid steer loaders, compact track loaders and multi terrain loaders means fork tines can be easily re-spaced or changed, and locked into place.

ADDED VERSATILITY

Off-center cutout on backhoe loader and small wheel loader models allows for quick, easy fork changes.
GENERAL PURPOSE BUCKETS

Our general purpose buckets are ideal for digging in low-impact, moderately abrasive materials such as dirt, loam, gravel and clay. Our buckets maximize capacity, loading, unloading and are designed using the highest quality materials for a long useful life. Select from a range of bucket sizes and teeth.

INTEGRATED BUCKET STOPS
Protects machine from over center dumping.

MULTIPLE INTERFACES AVAILABLE
Brackets allow quick, easy engage and disengage of the machine quick coupler.

HIGH STRENGTH MATERIALS
Incorporated into overall design for optimal wear life.

OPTIONAL BOLT-ON CUTTING EDGE, TEETH AND SEGMENTS
Provides peak support to base edge for added durability and performance.
HAMMERS

Our hammers were designed for crushing impacts, reducing rock and concrete materials quickly and efficiently. Each hammer features an automatic shut-off and buffering system to reduce machine vibrations. Additionally, fully enclosed silenced hammers are available to suppress ambient noise.

*Flat top and pin-on models available
**Includes hammers, standard tool and mounting bracket

FULLY ENCLOSED HOUSING

Lowers overall noise level for quieter, safer job sites, especially in restricted zones such as hospital zones, residential areas and other noise-regulated areas. Also helps protect internal power cell and eliminates stress points.

STANDING HEIGHT GREASE POINT

Makes maintenance comfortable and easy.

MULTIPLE TOOL OPTIONS

Heat-treated, matched to piston diameter and mass to deliver full-blow energy.

GAS-FIRED OPERATING CYCLE

Delivers consistent, reliable performance, especially when breaking materials like non-reinforced concrete, asphalt and cinder block.

AUTOMATIC ADJUSTMENTS

Suits flow and pressure of Cat carrier for improved performance and longer service life.

MOUNTING OPTIONS

Available in pin-on configuration for Cat Carriers or flat-top arrangements that come with multiple mounting brackets, which bolt onto the hammer.

GAS PORTS AND VALVES

Just plug and perform. No adjustments to pressures or flows. Ports positioned for convenient installation on your Cat carrier, while hoses are protected.

TRI-SUSPENSION SYSTEM

Available on silenced models to guide power cell, enable manageable, smooth performance and comfortable, responsive operation.

ATTACHMENTS

BHL: Backhoe Loader
CTL: Compact Track Loader
MHEX: Mini Excavator
MTL: Multi Terrain Loader
SSL: Skid Steer Loader
SWL: Small Wheel Loader

**Includes hammers, standard tool and mounting bracket
HIGH DUMP BUCKETS

Our high dump buckets are made to effectively move large quantities of low-density materials. The dedicated dumping cylinders and bottom hinge gently roll material out and a grated spill guard directs materials while loading and unloading, without impeding visibility. They’re ideal for transfer stations or loading high-sided trucks.

SWL: Small Wheel Loader

EXTRA PROTECTION

Comes with dedicated dumping cylinders and a bottom hinge to “roll out” material. Dual hydraulic cylinders are protected within the bucket structure.

REINFORCEMENT PLATES

Strengthens inside and rear of bucket for heavier loads.

SPILL GUARD

Protects linkage, but permits visibility.

ROUNDED SIDEBARS

Helps funnel and retain material.

SIDE WALL CYLINDERS

Long, flat bottom for better fill and dump.
LIGHT MATERIAL BUCKETS

Our light material bucket capacities range from 0.68 to 4.97 m³ (0.90 to 6.5 yd³) and are best at finishing, site clean-up and prep work when moving low-density debris and materials.

CTL: Compact Track Loader  CWL: Compact Wheel Loader
MTL: Multi Terrain Loader  SWL: Small Wheel Loader

ADVANCED DESIGN
Bucket shape and strike plane angle are engineered for consistent load sizes and greater material retention.

GREATER DURABILITY
Torque tube increases rigidity for wet, heavy loads of snow.

LONG-LASTING EDGES
Bolt-on cutting edge is reversible and replaceable, ensuring complete contact with the ground for maximum snow removal.

INTEGRATED STEP
Built-in step makes it easier to safely enter and exit the machine. Metal grating helps improve grip in wet weather. On models with skid steer loader coupler interface only.
MATERIAL HANDLING ARMS

Move material with ease. Our material handling arms allow greater reach and easy transportation of anything you can get a grip on.

**RIGID CONSTRUCTION**
Heavy-duty design is ideal for lifting, carrying and loading a variety of materials and equipment.

**INTEGRATED STEP**
Built-in step makes it easier to safely enter and exit the machine. Metal grating helps improve grip in wet weather. On models with skid steer loader coupler interface only.

**ADVANCED GRIP**
Heavy-duty locking clasp swivels a full 360 degrees.

**SUPERIOR SIGHT LINES**
Single, multi-angled boom provides excellent view to the load.
MIXING BUCKETS

Our mixing buckets feature cement bag breakers on top for easy addition of bagged materials. Built with reinforced steel for longer life and reduced wear, this attachment is also equipped with a cutting edge that makes it easier to drive into piles of raw materials.

SSL: Skid Steer Loader

CUTTING EDGE
Allows driving into piles of raw material.

REINFORCED STEEL
Ensures longer life and reduces wear.

HIGH TORQUE
Standard flow hydraulic motor spins a large gear reduction, which maximizes mixing torque and ensures thorough, repeatable mixing.

BOLT-ON PADDLES
Reaches throughout bucket to combine material.

CHUTE DOOR
Hydraulically controlled to dispense material from machine’s cab.
PICKUP BROOMS

Capture and contain material from road surfaces or your jobsite. Our pickup brooms are built to clean and sweep any surface. Available water kits reduce dust plumes.

INTEGRATED HOPPER
Sweep and deposit material into an integrated hopper bucket for easy removal and dumping.

DUAL DIRECTION CAPABILITY
Our brooms operate in forward and reverse for the ultimate in sweeping versatility.

MORE OPTIONS
Gutter brushes, available for BP115C and BP118C models, allow for sweeping alongside curbed surfaces.

GREATER DURABILITY
Rigid and durable broom frames protect vital drivetrain components to minimize downtime.

BETTER BRISTLES
Polypropylene/wire convoluted brushes provide optimum performance for sweeping applications.

SWL: Small Wheel Loader

### DEFLECTOR

Integrated in the top of the bucket to direct material around the loader linkage.

### PERFORMANCE SERIES

Rounded sidebars, opened throat, and longer floor improves fill factor up to 110%.

### OPTIONAL FUSION HOOK

Minimizes distance between attachment and tires for improved stability and lifting capacity.

### ADDITIONAL WEAR PLATES

Extra support to improve life in extreme conditions.
SPECIAL APPLICATION BROOMS

With a reinforced core and high-strength, extra-thick polypropylene bristles, our special application brooms are built for aggressive sweeping, capable of moving heavy material and coal seams. An optional water system and shield are available.

SWL: Small Wheel Loader

METAL SHIELD
Keeps debris moving forward and downward.

WATER SPRINKLING SYSTEM
400L capacity water tank with full water sprinkler system effectively suppresses dust.

BRISTLES
1/3 larger than standard size for added strength and durability.

INTEGRATED LEVEL AND BROOM PITCH INDICATORS

ADJUSTABLE BROOM DOWN PRESSURE WITH SINGLE BOLT
Water lines, jets, pumps and motors are protected, yet easily accessible.
UTILITY BROOMS

Cat brooms feature even-pressed sweeping for thorough cleaning. Our utility brooms are designed to gather light debris, in forward or reverse, making them ideal for factory floors and cold planing applications.

GREATER DURABILITY
Reinforced high-strength steel and a curved hood design protect against damage from front hood impacts.

ADDED VERSATILITY
Bidirectional bristle rotation allows for dust pan or over-the-brush sweeping of debris.

ADVANCED SWEEPING
Adjustable locking nut allows the brush core to float, for reduced bristle wear, or provides positive brush down-force for aggressive sweeping.

INCREASED EFFICIENCY
Large hopper capacity means longer sweeping cycles and a wide opening on the hopper makes emptying easier.

MORE OPTIONS
Water sprinkler kit is available for dust suppression and a bolt-on cutting edge for extended hopper life in severe applications.

ENCLOSED DESIGN
Rubber boot on front and sides aids in containing debris and airborne contaminants while sweeping.
WHEEL SAWS

Our wheel saws can penetrate hard or compact surfaces like asphalt, reinforced concrete, rocky soil or frozen ground. They’re ideal for road and utility trenching applications. Hydraulic side-shift and depth control make operating easy. And our deflector plates remove debris from the machine’s path for a smooth operation.

SSL: Skid Steer Loader

HYDRAULIC ADJUSTMENT
Control depth and side shifting from machine’s cab.

DEFLECTOR PLATES
Removes spoil from machine’s path on right and left sides.

CAT XT™ HOSING
Leak-free performance.

COLLAPSIBLE LEGS
Allows attachment to stand independently.

BITS
Concrete bits are standard on all models. Optional all-purpose conical bits are available for tarmac and asphalt applications. Extreme-life bits are available for extreme-duty Cat Wheel Saw applications.

TRENCH CLEANING DEVICE
Hydraulically controlled from cab. The blade can be maneuvered up and down to remove spoil and ensure a clean trench.

MAX PRO GAUGE
Delivers operator feedback to maximize productivity.
VIBRATORY DRUM COMPACTORS

Before pouring concrete or laying asphalt, smooth foundational surfaces with our vibratory drum compactor. Ideal for compacting soil, sand or gravel as well as compressing asphalt patch work, these compactors are often used in residential, commercial and industrial applications.

**FINISH-GRADE WORK**
Exclusive vibratory pod design delivers balance between frequency and amplitude to provide a superior matte finish.

**INCREASED PRODUCTIVITY**
Higher compaction capabilities provide twice the force of the original design requiring fewer passes for greater productivity.

**GREATER DURABILITY**
High-strength steel drums are roll formed and finish welded for a smoother surface and longer life.

**SERVICEABLE DESIGN**
Replaceable rubber mounts isolate vibration and enhance vibratory capabilities.

**AUTOMATICALLY ADJUSTS**
Pivoting interface allows the drum to oscillate by 15 degrees, following the contour of the ground.

**INDUSTRY-LEADING PERFORMANCE**
Spring-loaded, dual direction scraper bar maintains constant pressure on the drum to prevent material build up. Its non-metallic construction minimizes noise.

**LONG-LASTING MATERIALS**
Cat XT-3 ES hose, couplings and O-ring face seals provide superior, leak-free performance and reliability. And all hoses are wrapped with nylon woven cordura sleeving for added protection.

**SIMPLIFIED MAINTENANCE**
Pod-style weight housings are factory sealed for longer bearing life and easy serviceability.

---

**ISOLATORS**  
Protected inside the frame for extended durability.

**PRESSURE/FLOW CONTROL VALVE**  
Safeguards against damaging pressures and flows to enhance reliability.

**REAR CENTERLINE PLUG**  
Simplifies oil changes through a more complete drain.

**PROTECTED HYDRAULICS**  
Covers hoses inside frame of compactor to avoid damage sources.

**BACKFILL BLADE**  
Pushes loose material into place for faster trench work.

**OIL-BATH BEARING**  
Continuously lubricated for extreme reliability and minimal maintenance.
COMPATIBILITY

Skid Steer Loaders, Compact Track Loaders, Multi Terrain Loaders
- Angle and Dozer Blades
- Angle Brooms
- Cold Planers
- Forks
- General Purpose Buckets
- Hammers
- Light Material Buckets
- Material Handling Arms
- Mixing Buckets
- Pickup Brooms
- Utility Brooms
- Wheel Saws
- Vibratory Drum Compactors
