

Cat[®] Ground Engaging Tools Performance Cutting Edge System

For D6, D7, and D8 Medium Track-Type Tractors Equipped with SU Blade

Penetrates Easier Loads Faster Increases Productivity

When you need precision blade control that slices through the toughest materials, Cat[®] performance cutting edges give you great value with excellent productivity. They're designed for your toughest applications and can give you up to 35% increase in payload mass and 17% greater productivity over standard production cutting edges.

LET'S DO THE WORK.™

Cat® GET Performance Cutting Edge System

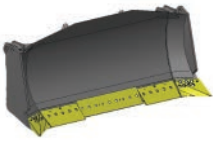

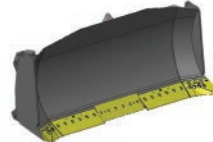

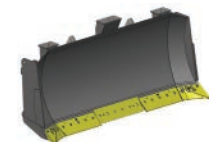

Performance cutting edges reduce skating and focus the energy on slicing instead of breaking up the material. Ideally suited for tough-to-penetrate materials such as compacted, rocky, or frozen soils where blade penetration is difficult, which in turn results in less ripping. This unique design will provide service life equal to current product without having to flip the edge, resulting in less downtime.

Feature	Benefit
Sharpened, forward-protruding profile cutting edges	Superior penetration
DH-2 steel on center cutting edges; DH-3 on end bits and intermediate cutting edges	Maximum wear life and breakage resistance for equal wear life across the entire blade
On-plane cutting system	Superior finishing – dig when you need to, finish when you don't

Field Validated – Operator Feedback

- Blade loads easier
- Edges get underneath rocks instead of skating over the top
- Don't need to use the steering system as much
- Material rolls easily into the center of the blade

Performance System Packages

		End Bit	Intermediate Edge	Center Edge	Nut	Bolt	Washer
D8		479-8129 (RH)	479-8131 (RH)	7T-9126 (STD)	2J-3507	4J-9058	5P-8250
		479-8130 (LH)	479-8132 (LH)	522-3986 (LGP)
