

# EQUIPMENT HEALTH MANAGEMENT

## Maximize Equipment Uptime and Lower Life Cycle Cost

### » PEOPLE PROCESS AND TECHNOLOGY

Equipment Health Management (EHM) is Solar's premier machinery healthcare service program. EHM is a managed, proactive service provided by an assigned Solar Fleet Manager and backed by our Global Technical Support Network. Powered by state-of-the-art InSight Platform™ technology, EHM delivers consistent results that maximize customer production, uptime and profitability.

- › Maximize Equipment Availability and Reliability
- › Lower Life Cycle Costs
- › Collaborative Day -to-Day Machinery Support
- › Real-Time Remote Monitoring and Troubleshooting
- › Predictive Analytics and Fleet Statistics
- › Optimized Maintenance and Reduced Downtime
- › Proactive Obsolescence Identification and Support

## PROACTIVE MANAGED CARE

### FLEET MANAGER

The Fleet Manager ensures your Solar equipment is performing at its absolute best. Located within your time and space to support your business, Fleet Managers provide proactive equipment support and expertise.

### INSIGHT PLATFORM

InSight Platform is an entire ecosystem of tools and capabilities for intelligent, data-based decision making. It delivers advanced remote technology for real-time troubleshooting, predictive analytics and downtime avoidance.

### GLOBAL TECHNICAL SUPPORT NETWORK

Our global team of OEM experts are committed to your success. With years of proactive service delivery experience, our robust processes reinforce best practices and efficient risk management.
