

COMMITMENT TO THE MIDDLE EAST

Progress Rail's deep industry expertise, together with the support of our parent company, Caterpillar, ensures a commitment to quality through innovative solutions for the rail industry. Through operations in the Middle East and North Africa (MENA), Progress Rail tailors its deep industry expertise to local markets to deliver world-class rolling stock, infrastructure and diesel engine solutions.

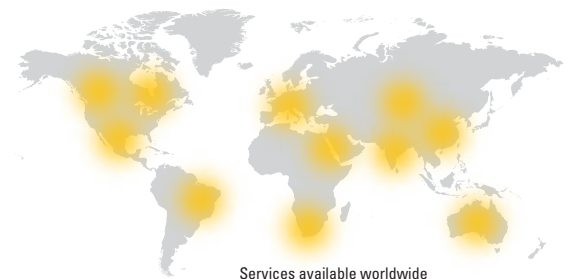

For more than 60 years, Progress Rail has maintained its strong, in-country presence through our EMD® branded products, providing diesel-electric locomotives with a superior performance record. We are proud to continue that legacy with our broadened product offering to meet and exceed customer needs.

EMD® locomotives perform in some of the most extreme conditions, including desert environments and rugged terrain. Our dedicated team has supplied and continues to support the majority of the locomotive fleet in the region. Progress Rail provides local rolling stock support and in-country services to our customers in the region, through offices in Riyadh and Abu Dhabi. Similarly, our Maintenance-of-Way division provides infrastructure support services through our Kershaw® Ballast Regulator and sand removal equipment to help maintain railways and clear tracks of built-up sand.

We are committed to local economic development and have assisted with important regional services, such as the transportation of minerals and general goods, as well as passenger services.
