

## COMMITMENT TO AFRICA

Progress Rail is working to provide technological advancements to reach across the African continent. At Progress Rail, we are responsible for marketing advanced solutions in the rail industry. Our products, people and relationships enable us to lead the industry as we improve productivity and safety standards. We provide services and solutions to rail customers in Sub-Saharan Africa, leveraging existing resources in the region.

Progress Rail's products have performed in nearly every imaginable condition from the sands of the Sahara, to the heights of the Andes, to the demanding grades of the Powder River Basin. Progress Rail offers services and solutions to rail customers in Africa, leveraging Progress Rail and the existing Caterpillar footprint and resources in the southern Africa region.

Products and services offered include new locomotives, rebuilds, refurbishments, parts and all types of locomotive maintenance. EMD locomotive products include various options, including new, like-new, modernization, re-engine and overhaul. Progress Rail also offers engineering and track services, which include both product and service offerings, i.e. new and used rails, turnouts, rail crossings, crossing signals, frogs and various other track services.
