

CONFIDENT OPERATORS ARE **PRODUCTIVE OPERATORS**

DESIGNED FOR CONTROL

Proven Cat braking systems deliver superior control so your operators can focus on productivity. Like all Cat mechanical-drive trucks, the 797F features four-corner oil-cooled brakes and Automatic Retarder Control to improve handling and machine control so operators can work quickly and confidently.

The brakes are continuously cooled by water-to-oil heat exchangers for exceptional, non-fading braking and retarding performance. With retarding power applied to all four corners, the full weight of the truck can be applied for traction, resulting in the ability to hold a higher retarding force in poor underfoot conditions.

DESIGNED FOR COMFORT

With two cab options, you can equip your 797F with the features you desire. All options offer an ergonomic layout, and controls, levers and switches that are positioned for ease of use. The cab includes dozens of features designed to enhance comfort and reduce fatigue, such as reduced vibration and sound, and a next generation seat that includes a height adjuster; adjustable shoulder stock to keep the seatbelt from rubbing; and seat back, side and lumbar bolsters to increase stability. The cab provides excellent all-around visibility, which is further enhanced with the optional Work Area Vision System and Cat MineStar™ Detect.

SAFETY-INFUSED

From slip-resistant surfaces and guard rails to state-of-the-art collision avoidance technologies, the Cat 797F is infused with features to help operators feel safe and confident on the job.
