

CONFIDENT  
OPERATORS ARE  
**PRODUCTIVE  
OPERATORS**

## DESIGNED FOR CONTROL

Proven Cat braking systems deliver superior control so your operators can focus on productivity. Like all Cat mechanical-drive trucks, the 793F features four-corner oil-cooled brakes and Automatic Retarding Control to improve handling and machine control so operators can work quickly and confidently.

The brakes are continuously cooled by water-to-oil heat exchangers for exceptional, non-fading braking and retarding performance. With retarding power applied to all four corners, the full weight of the truck can be applied for traction, resulting in better control, more operator confidence and typically higher speeds in poor underfoot conditions.

## DESIGNED FOR COMFORT

With multiple cab options, you can equip your 793F with the features you desire. All options offer an ergonomic layout, excellent all-around visibility, and controls, levers and switches that are positioned for ease of use. The cab includes dozens of features designed to enhance comfort and reduce fatigue, such as automatic climate control, sound suppression, and a next generation seat that includes a height adjuster; adjustable shoulder stock to keep seatbelt from rubbing on the operator's neck; and seat back, side and lumbar bolsters to increase stability.

## SAFETY-INFUSED

From slip-resistant surfaces and guard rails to state-of-the-art collision avoidance technologies, the Cat 793F is infused with features to help operators feel safe and confident on the job.

Diagonal stairway  
and optional powered  
access stairway

High visibility nosing  
on all stairs

Integral ROPS cab

Three-point operator restraint

Body raised indicator

Factory-installed Cat®  
MineStar™ Detect system

Emergency  
engine shutdown

Lockouts for  
battery, starter  
and transmission
