

CONFIDENT OPERATORS ARE **PRODUCTIVE OPERATORS**

DESIGNED FOR CONTROL

The 789D offers superior braking and retarding control for increased operator confidence. Caterpillar's patented mining truck brakes are without question the most respected and trusted in the industry. The oil-cooled, multiple disc brakes provide immediate, fade-resistant braking and retarding. The 789D has a true four-corner braking and retarding system proven in thousands of Cat mining trucks under every conceivable condition. With retarding power applied to all four corners, the full weight of the truck can be applied for traction, resulting in the ability to hold a higher retarding force in poor underfoot conditions.

DESIGNED FOR COMFORT

With three cab options, you can equip your 789D with the features you desire. All options offer an ergonomic layout, excellent all-around visibility, and controls, levers, switches and gauges that are positioned for ease of use. The cab includes dozens of features designed to enhance comfort and reduce fatigue, such as an air suspension seat, reduced vibration, automatic climate control and sound suppression.

SAFETY-INFUSED

From slip-resistant surfaces and guard rails to state-of-the-art collision avoidance technologies, the Cat 789D is infused with features to help operators feel safe and confident on the job.

Seat/shoulder belts with
three-point restraint
Secondary steering system

Wide angle mirrors

600-mm (24-in) wide stairway
and operator walkways

Powered Access option
Body raised indicator
Body retaining cable
Reverse neutralizer when dumping
Optional integrated Object Detection System
