

MORE TIME HAULING, LESS TIME SERVICING

The 789D was designed to reduce the time you spend on regular maintenance procedures. Enhanced serviceability and long service intervals help increase machine availability and productivity.

Features include:

- + 500-hour service intervals
- + Ground-level access to tanks, filters, drains and engine shutdown
- + Easier access to daily service points as well as major components
- + Maintenance platform with access to engine, steering hydraulic tank and battery compartment
- + Autolube automatic lubrication system
- + VIMS onboard diagnostic systems, which continuously monitor all critical machine functions and components to help locate faults quickly for faster repair
- + Optional fast fill service center, which enables high-speed fuel and oil exchange
- + Disconnect valves that are conveniently located throughout the hydraulic systems for easy pressure testing
- + Sealed electrical connectors to lock out dust and moisture
- + Individual cylinder heads that are interchangeable for easy removal and visual inspection
