

DESIGNED FOR CONTROL

Proven Cat braking systems deliver superior control so your operators can focus on productivity. The 795F AC has the best braking of any electric-drive truck in the world. It features four-corner wet disc brakes with blended mechanical service brakes and dynamics for greater operator confidence. Automatic Retarding Control makes retarding easier and more efficient and helps ensure the truck remains in the dynamic retarding envelope.

- + Automatic four-corner blended braking with dynamics during low speed / stopping improves handling and machine control

- + Brake temperature monitoring ensures component life and alerts operators if they are exceeding retarding capability
- + The spring-applied secondary parking brake system enhances safety

The front and rear brakes are designed with large discs and plates for reliable and adjustment-free operation. They're enclosed and sealed to prevent contamination and provide long life while delivering exceptional braking at all speeds.

BLENDED BRAKING
