

COMMITMENT TO EUROPE

Progress Rail leads the global rail industry through innovation and customer focus. In Europe, our Germany, Italy and United Kingdom locations serve our customers by bringing deep railway expertise to local markets, delivering world-class rolling stock, infrastructure and engine solutions.

ROLLING STOCK

Progress Rail offers broad post-delivery service for all EMD products (Class 66 & 77 and other locomotives), including comprehensive maintenance contracts, genuine OEM aftermarket parts, UTEX and rebuilt components, as well as locomotive retrofit options, modernization and vital technical support.

INFRASTRUCTURE

As the largest manufacturer of permanent way infrastructure for the United Kingdom, Progress Rail specializes in the design and production of permanent way switches, crossings and engineered products for mainline, freight, industrial and light rail customers to serve the UK and other customers around the world.
