

EXTENDED SERVICE INTERVAL (ESI)

1,000-HOUR EXTENDED SERVICE INTERVAL (ESI)

HOURS
500

HOURS
1,000

The ESI option increases the maintenance-free service running interval from 500 to 1,000 hours, ensuring reduced maintenance costs over the life of the generator set, further enhancing the product range for telecoms applications and remote installations.

The 1,000-hour free maintenance service is enabled through the use of a level valve; oil top up tank; double fuel filter and header, resulting in lower operating costs via:

REDUCED LABOR AND SUPPORT

REDUCED TRAVEL FREQUENCY

LESS GENERATOR SET DOWNTIME

REDUCTION IN REPLACEMENT PARTS REQUIRED

ESI OPTION

The ESI option is available to order as a factory fitted option on selected open and enclosed genset models within the 6.8-25 kVA range.

The 1,000-hour ESI is covered under the standard warranty terms. Retrofit kits are available to order for most models within the 6.8-25 kVA range.

Talk to us today about ESI by contacting your Cat® dealer.
