

# SPECIAL TRACKWORK DIRECT FIXATION

**Progress Rail**  
A Caterpillar Company

## Features:

- Industry standard, proven design and use
- Versatile stiffness range for North American transit applications
- Excellent lateral / gauge resistance

These special trackwork designs have been in service for more than 25 years. With locations across the United States and in Canada they have a demonstrated service history. The design allows for generous gage adjustment capabilities while also providing the typical resilient performance most transit agencies target.

Our product line is complete. Whether your needs are for small No. 6 turnouts or the large No. 20 double crossovers we have special trackwork direct fixation units for the switch areas, frogs, guard rails and crossing diamond locations.

Progress Rail has over 30 years invested in the supply of direct fixation fasteners servicing our transit, commuter and freight customers. Should your application be in tunnels, at-grade or on aerial structures we have a solution for your special trackwork needs.
