

Progress Rail's Recycling Division specializes in derailed equipment clean up, removal of retired or out of service rail cars and over-the-road railcar transportation. Our Recycling Division is centrally located in the US - North Central Alabama (Albertville) and services all of the 48 contiguous states.

From the Atlantic to the Rocky Mountains, our crews handle roughly 90 percent of the derailments and retired cars in this area.

Derailments are either high-profile or not. The high profile derailment requires an immediate response, which usually means the damaged and destroyed rail cars will be loaded whole onto a semi-tractor and

low-bed trailer and hauled to a rail car repair facility, repaired and put back inservice; or to a dismantling facility, where wheel sets and numerous other parts are removed, reconditioned to AAR specification and solid back to the railroads.

Derailments that are not restricting or interfering with the normal flow of highway traffic or creating an issue for private property or industry productivity, will be dismantled where they landed. We remove all the parts that can be reconditioned and ship them to one of reconditioning shops.

RECYCLING

CAPABILITIES:

Scrap Handling & Processing

Our Recycling operations are capable of handling ferrous and non-ferrous grades of metal. We are able to process up to 1,200 tons of scrap per day through our large, shredder operations, whereas our mobile and stationary shears can process anywhere from 200 to 250 tons of material per day.

Inbound & Outbound Shipping Options

We are proud to offer a fleet of new and well maintained trucks for your inbound shipping needs. We also own a large fleet of railcars for inbound and outbound shipping needs. For other outbound options, we not only have the ability to ship materials by rail or truck, but also by barge to make sure your material gets where it needs go.

Service

We offer 24/7 container service – from the point of call in for service to actual container pickup. Our team is ready to serve you, ensuring you receive same day payment for your scrap materials, and offers other payment options, as well.

COMMITMENT TO SUSTAINABILITY

Sustainability is not only a highlight of Our Values in Action as a part of Caterpillar – it is an action we take into account every day in the communities where we live and work – whether recycling end-of-life components, railroad materials or repowering or refurbishing a locomotive. We continuously examine ways to create innovative and sustainable products and improve upon our processes to maintain our standing as a rail industry leader.
