

Caterpillar Visitors Center

Media Information – Photo Captions

The following captions accompany the photos available for download at
<http://www.caterpillar.com/en/company/visitors-center/media.html>.

Photo Name	Caption
797 Entrance	Visitors begin their experience with a video in the bed of the 797F Mining Truck, the world's largest mining truck standing at two and a half stories high.
797 Front	The 797F Mining Truck can carry 400 tons of gold, copper, iron ore, overburden and other materials at more than 40 miles per hour.
797 Theatre	Visitors begin their experience with a video that highlights Caterpillar customers all over the world. This 66-person theatre is in the bed of a 797F Mining Truck, complete with rumble seats.
Caterpillar People at Work	Caterpillar employees from around the world are featured in the Meet Our People Gallery. Learn about various Caterpillar careers and how our employees give back to the communities where they live and work.
CVC Back	The Caterpillar Visitors Center opened in October 2012, and has welcomed over 100,000 visitors from nearly 40 countries.
CVC interior 173	Visitors operate track-type tractors and excavators on simulators used to train our operators.
CVCLarge	The Caterpillar Visitors Center opened October 20, 2012, and sits at the corner of Main and Washington Streets in downtown Peoria.
D8 Interactive 2	Visitors can see how hard it was to operate equipment from the 1930s on our D8 tractor in the Heritage Gallery.
Earth Mechanics 1	The Earth Mechanics exhibit showcases Similitude technology which is used to study soil and rock from all around the world in order to understand how Cat® machines interact with the earth on a job site.
Loco_001	Caterpillar is committed to delivering sustainable products that facilitate the reliable movement of goods and services. Here, an Electro-Motive Diesel SD70ACe locomotive is shown in Caterpillar yellow, hauling a track-type tractor.
Model Twenty – Heritage Gallery	The Model Twenty Tractor was the first tractor designed by the Caterpillar Tractor Co. and was first produced in 1927 in San Leandro, Calif. This particular tractor is fully-restored and operational.
Power Systems Diorama	Caterpillar serves more than the construction industry. The Power Systems Gallery highlights Caterpillar's industrial engines and power solutions, marine, rail, gas turbine technology, and oil, gas and global electric power.
Product Floor 4	Our product display floor is a visitor favorite, as children young and old can climb into Cat® equipment and see the No. 31 Caterpillar NASCAR on the product floor.
Product floor panorama	The Caterpillar Visitors Center product display floor is updated every year with new equipment to showcase the breadth of the Cat® product line.
