Congratulations and thank you for purchasing a Rubbermaid storage building.

BEFORE YOU BEGIN — BUILDING CODES
Be sure to check your local building codes, ordinances and restrictions, and applicable neighborhood governances.

BEFORE YOU BEGIN — SURFACE PREPARATION
To ensure proper assembly and performance your shed needs to be built on a solid, level surface. A concrete or patio surface, or a treated-wood platform is recommended.

BEFORE YOU BEGIN — LOCATION
When choosing a location in your yard make sure you choose an area with easy access and one that provides proper drainage for water to run away from the shed location.

BEFORE YOU BEGIN — PREASSEMBLY
Thoroughly review all assembly steps (it is important that the steps are followed in the correct order). Review the parts list and make sure that no parts are missing.

IMPORTANT — DO NOT RETURN TO THE STORE
For assistance with your Rubbermaid Storage Building or for additional product information call our toll-free Consumer Service number: 1-888-895-2110
M–F: 8:30 a.m. to 5:00 p.m. EST
or visit us online at: www.rubbermaid.com.

Installation Steps:
1. Site Preparation
2. Floor
3. Walls
4. Roof & Doors
5. Finishing

Note: Be sure to keep this instruction manual and your original store receipt to ensure our Consumer Service Department can accurately and quickly assist you if necessary.
**PREASSEMBLY:**
- Review ALL assembly steps before beginning construction.
- Review the parts list and make sure that no parts are missing.

**NOTE:**
- To simplify assembly and to ensure proper engagement of all components, apply a mild detergent to dovetail and snap fits before assembling.
1.0 Site Preparation

FLOOR PLAN:
Size the construction site to fit the entire floor.

OPTIONAL STEP:
If desired, recessed anchor locations (5 places) can be used to anchor the shed floor to a foundation after you have constructed one.

Build a solid, level surface for the shed foundation. Consult your local building authority for ordinances, restrictions, or permits required before building any structure at your home.

Note: Minimum dimensions for foundations shown.
2.0 Floor Installation

a. Using a rubber mallet and screwdriver, knock out the tabs for the door hinge, 2 places on Front Floor (A).

b. Drill pilot hole through top surface of floor, 2 places on Front Floor (A).

CAUTION: Drill through top surface of floor only!
3.0 Wall Panel G Installation

a. Using a screwdriver, punch out the screw holes on the top of Front Left Side (G) 2 places.

b. Drill a pilot hole (using 1/8" drill bit) in front lower corner at location indicated by screw target.
   Note: This pilot hole is to be drilled through both walls.

c. Snap Front Left Side (G) into Front Floor (A).
   Hold Front Left Side (G) upright to prevent it from falling (until Left Back (D) is installed).
3.1 Wall Panel D Installation

a. Using a screwdriver, punch out the screw holes on the top of Left Back (D) 4 places.

b. Connect Left Back (D) into dovetails of Front Left Side (G).

HELPFUL HINT: Lubricate dovetails with liquid soap.

C. Engage snaps on bottom of Left Back (D) into Front Floor (A).
3.2 Wall Panel H Installation

a. Using a screwdriver, punch out the screw holes on the top of Front Right Side (H) 2 places.

b. Drill a pilot hole (using 1/8" drill bit) in front lower corner at location indicated by screw target.
   Note: This pilot hole is to be drilled through both walls.

c. Snap Front Right Side (H) into Front Floor (A).
   Hold Front Right Side (H) upright to prevent it from falling (until Right Back (F) is installed).
### 3.3 Wall Panel F Installation

#### a. Using a screwdriver, punch out the screw holes on the top of Right Back (F) 4 places.

#### b. Connect Right Back (F) onto dovetails of Front Right Side (H).
Align the lap joint between Left Back (D) and Right Back (F).

**HELFUL HINT:** Lubricate dovetails with liquid soap.

#### C. Engage snaps on bottom of Right Back (F) into Front Floor (A).
d. Install Wall Connector (D) 5 places, connecting Left Back and Right Back Panels (D and F). Position connectors in slots and slide down to snap in place.

4.0 Roof Panel J & Door Installation

a. Install Front Roof (J) onto side sections. Align tongues on top of side walls into grooves in roof.
b. Slightly raise front edge of roof enough to allow positioning of Roof Brace (RB) onto the side walls as shown. Lower the roof onto the walls and align Roof Brace (RB) into pocket in Front Roof (J).

C. Ensure Front Roof (J) is positioned against the back wall tongues. From outside the shed, install one Screw (AA) at each corner. Hold the edge of the roof down firmly at the corners while installing each screw. Install remaining screws into remaining locations of back walls.

Helpful Hint: Installation is easier using a magnetic bit or starting screws with a manual screwdriver to get seated. Pilot holes also may be drilled using 1/8" bit.
d. Install **Left Door (L)** and **Right Door (K)** into hinge openings of **Front Floor (A)** and hinge sockets in **Front Roof (J)**. Note: Only raise front edge of roof enough to install the door hinge pins.

e. From inside the shed, install four **Screws (AA)** into the roof, two on each side wall. Note: The screws also have to go through the **Roof Brace (RB)** at each end to properly secure the roof! A second person on the outside of the shed should hold down the edge of the roof firmly at each screw location.

### 5.0 Finishing Installation

a. Install **Screws (AA)** into 6 locations shown at bottom of wall panels to secure walls to floor. 

**HELPFUL HINT:** Pilot holes may be drilled for the screws. 

**CAUTION:** Do not overtighten screws.
5.1 Door Finishing Installation

a. Install Lock Hasp (X) into opening on Left Door (L).

b. Install Door Handle (T) onto Left Door (L) using four Screws (AA).

Repeat steps for Right Door (K).

---

MAINTENANCE & SAFETY

- Periodically check shed to assure it remains stable and the site remains level.
- In areas of high winds it is recommended to anchor shed to platform or ground by holes in floor at designated location and secure with the proper fasteners (not included).
- Wash shed with garden hose or a mild detergent solution. Using an abrasive cleaner could damage your shed.
- Hot items such as recently used grills or fire pits should not be stored in the building.
- Heavy items should not be leaned against the walls, as this may cause distortion.
- Keep doors closed when not in use to prevent wind damage.
- Do not climb onto roof.
- Shed is not designed for habitation.
