4 Install Upright Extensions

Slide in upright connector into the bottom two notches of the short upright.

Slide in other end to upright connector into the bottom two notches of the long upright. Use a level to position the short upright and mark the position of the top & bottom screw holes.

Fasten screws Drill 1/8" pilot holes & fasten both screws (use wall anchor & 3/8" bit if there is no stud). To position the second upright extension, use 22" rail cover to ensure proper spacing is parallel from the first upright extension.

Hint: Install these in the area of the closet where you would be most likely to install accessories (sold separately) or shelving closer to the floor. Use shoe shelf brackets (included) to create additional storage space.

5 Install Brackets and Expanding Shelves

Insert brackets Insert brackets into uprights at desired locations. Note: Install brackets and shelving at the top first and work down. Brackets will not fit into upper two slots of each upright.

Hint: When overlapping sections of shelving, shelves labeled "A" must be placed onto brackets before shelves labeled "B".

Overlapping shelves Shelves are fully adjustable and require no cutting. To adjust width, overlap the shelves making sure the shelf labeled "A" is placed first on the brackets and the shelf labeled "B" is placed on top of "A".

Hint: When overlapping sections of shelving, shelves labeled "A" must be placed onto brackets before shelves labeled "B".

Place shelves onto brackets

Secure shelves with bracket locks After all shelves are positioned properly, lock shelves into brackets by sliding the plastic locking clip towards the back wall. It will "snap" into locked position.

Install shelves into brackets Confirm that the bracket locks are unlocked and install shelving making sure that the "nose" of the bracket is projecting out through the front edge of the shelf. Note: For maximum weight capacity, do not insert brackets into bottom slots of upright.

Hint: If shelves are installed in the incorrect notch, shelving weight capacity could be lessened.

6 Install Adjustable Clothes Rods

Adjust rod length

Add end caps

Secure rod and hanger After expanding clothes rod to desired length, place into rod hangers and press down to snap into place. Note: do not extend more than 3" past rod hangers.

Press firmly into place

The following parts are packed together in a hardware bag:

Screws 1603168 1603168 24
0.5" Drywall Anchors 3165 3165 18
Anchor Push Pin 3166 3166 1
2" Rail Covers 3155 3155 2
Clothes Rod End Caps 3671 3671 8

To adjust width, overlap the shelves making sure the shelf labeled "A" is placed first on the brackets and the shelf labeled "B" is placed on top of "A".

Certification and Compliance: The following parts are packed together in a hardware bag:

Screws 1603168 1603168 24
0.5" Drywall Anchors 3165 3165 18
Anchor Push Pin 3166 3166 1
2" Rail Covers 3155 3155 2
Clothes Rod End Caps 3671 3671 8

Depending on the configuration you choose to install, you may not use all of the components.
2 Mount Overlapping Hang Rails

NOTE: hang rail MUST be mounted to studs.

Wall stud

Locate studs

On closet wall, locate all wall studs and mark them 86.5" above the floor. Using a stud finder can be useful (optional).

*Hint: Draw a pencil line across your 86.5" mark to identify screw placement and ensure that the line is level.

Secure left end of rail - rail overhang

If there is a stud within 4" from the wall, skip steps D (1) and D (2).

D (1)

Second hole from left

Locate studs

On closet wall, locate all wall studs and mark them 86.5" above the floor. Using a stud finder can be useful (optional).

Position rail

Position first hang rail so that the rail is touching the left side of your closet.

C

Level rail and drill pilot holes

Level hang rail and mark holes 86.5" above floor that land on studs, then drill 1/8" pilot holes for screws.

D (2)

Rearrange of Rail

86.5"

Screw into studs spaced no more than 24" apart

Drywall anchor installation*

Mark and drill a 3/8" hole (for a wall anchor) in the second hang rail hole from the left. To compress the anchor, fold the sides and bend. Hammer the wall anchor flush to wall in the drilled hole. Insert anchor push pin to engage anchor, then remove.

*Anchors for concrete, plaster or steel wall installation must be purchased separately.

Position second hang rail if closet space is wider than 4'

Slide second hang rail down behind the first from above.

E

Extend second hang rail

Slide second hang rail as far right to the wall as possible while still maintaining hole alignment. Repeat step C to secure to the wall. If there is not a stud within 4" of the RIGHT end of the hang rail, repeat the dry wall anchor installation step above.

G

Secure second rail from right side

Install screws into studs along rails. Secure rail in all studs.

F

Hang Uprights

Hang the uprights

Hang first two 47.5" uprights over the hang rail.

A

Position at 22" from the right and left corners by using the 22" rail cover for spacing.

C

Secure

Mark bottom hole of each upright. Drill 1/8" pilot hole into stud. (Use wall anchor and 3/8" bit if there is no stud.) Place 22" rail cover over rail between uprights. Repeat step F for additional uprights (if space allows).

B

Fasten at bottom

Fasten screws into studs or wall anchors. Screws are needed only in bottom holes of uprights.

D

Hang rail

Hang another 47.5" upright on the rail and use one of the 22" rail covers to space over 22". Drill 1/8" pilot hole and fasten screws in bottom hole. (Use wall anchor and 3/8" bit if there is no stud.) Place 22" rail cover over rail between uprights. Repeat step F for additional uprights (if space allows).

E

Attach 22" rail cover

Clip 22" rail cover over hang rail so uprights stay in place.

F

Use 22" rail cover for spacing

If the space between the last uprights is less than 22", you may choose to cut rail cover with scissors to fit.

Note: Add-on accessories require uprights to be placed at 22" apart.

G

Attach 22" rail cover

If the space between the last uprights is less than 22", you may choose to cut rail cover with scissors to fit.

Note: Add-on accessories require uprights to be placed at 22" apart.

*Anchors for concrete, plaster or steel wall installation must be purchased separately.

Before securing uprights, be sure to assess your storage needs. If you are using Homefree accessories, ensure that there is no stud.

Hint: Determine the placement of your shelves and hang rails. Start from the top and work your way down to ensure that you have enough room.

Plan Your Layout
