Use & Care

To keep your new containers performing at their best, please read the following:

- Remove label and wash before use.
- This item is made of materials that are safe for normal household dishwashers. Be sure that the item is secured so that it does not come in contact with the dishwasher element to avoid melting.
- This item is made of materials that are safe for freezer use. Please note that plastics are less flexible when cold or frozen and may break if dropped. Also note that water expands when frozen, so when filled to capacity the container could expand and crack.
- Do not use utensils with sharp edges (i.e. knives) in the container, as they could scratch or scuff the container surface.
- Stack canisters side by side to save to space in your pantry.
