

Rubbermaid® Clean & Dry™ plunger

7Z88

- Rubbermaid Clean & Dry™ plunger minimizes the spread of germs and helps keep your home clean and sanitary. The head and pole are protected by NeverWet™ coating, which forms a protective shield that water cannot penetrate. It works like car wax, water beads up and rolls off instantly. With proper use and care, the NeverWet™ coating will remain effective for thousands of plunges.

Care & Use

To keep your new Clean & Dry™ plunger working for thousands of plunges, we recommend the following:

- **The unique NeverWet™ coating is affected by the natural oils in your skin, please avoid touching the protective coating as it may impact product performance.**
- Grab only the handle when removing from package. Pull the tab on the back of the packaging and carefully remove.
- Should you want to clean your plunger, bleach is recommended. Do not clean with soap as it will diminish the performance of the NeverWet™ coating.
- Given the coating sensitivity to oils and soaps, we recommend you store your Clean & Dry™ plunger in a linen closet, bathroom cabinet or another place where it will not be handled unnecessarily.
