Use the Installation Guide on pages 7 and 8 to secure the two Wall-Hanging Brackets (#8) to the wall. Installation Guide for the WALL-HANGING BRACKET of the UltraHD® Wall Cabinet (Model No. 20229, 20031, 20032, 20033)

A. Decide where to hang the Wall Cabinet.

Note: We recommend that the cabinet be hung such that the bottom of the cabinet rests approx. 63" above the floor.

B. Start from one side of desired location to find the 1st stud location for installing the Wall-Hanging Brackets (#8). Use a stud finder to locate the stud and use a pencil to mark the center of the stud.

C. Locate the 2nd stud 16" from either side of the 1st stud location.

Note: The distance between two studs is normally 16" (center to center).

***Drill a small hole (1/4" diameter) at both stud locations to ensure that the hanging anchor is secured.**

D. To find the rest of the screw holes to fasten the Wall-Hanging Brackets, please refer to the accompanying shop drawing. Place the shop drawing on the wall, and align the holes in the drawing with those already drilled in the wall.

Note: The shop drawing shows the actual size of the Wall Cabinet (24" by 24") and indicates the locations of the holes on the Wall-Hanging Brackets. You may also want to temporarily tape the drawing to the wall for marking the locations of the screws. Use a small nail to penetrate the shop drawing and mark the eight points to fasten the Wall-Hanging Bracket. After marking locations, pre-drill a small hole (1/4" diameter) at each of the eight hole locations.

E. Use Screw M (#55) to fasten Wall-Hanging Brackets (#8). Hang the unit on the Wall-Hanging Brackets (#8) as following pictures show.

The wall cabinet can also be mounted on a brick, masonry, or basement block wall using the correct concrete wall anchors and screw set. Each wall anchor must support up to 25 lbs loading capacity.
