## Drive your business.

Security meets customization.

 Unlocked by Samsung

# Galaxy Note8

## Now customization meets security.

The Galaxy Note8 Enterprise Edition gives you the combination of powerful and simple device management, defense-grade security, customization capabilities with support from tailored partner solutions, and a complete business ecosystem. Now you can make the impact your business demands.

### Simplified deployment and management.

**Take complete control.** Enterprise Firmware Over-The-Air updates (E-FOTA) with the Galaxy Note8 Enterprise Edition give you complete control. Schedule updates for these devices, so they always have the right firmware and software. With E-FOTA, your team's devices are always compatible with your company's solutions, and every device remains a secure one.

**Easy to provision and customize.** Knox Configure is a cloud-based tool that allows you to get out of the box quicker. Remotely provision and configure one or many of your Galaxy Note8 Enterprise Edition devices while skipping unnecessary setup screens. Knox Configure also allows you to install the right applications, control fine grain device settings and apply company branding for a custom experience.

**Shed the bloatware.** The Galaxy Note8 Enterprise Edition has no pre-loaded carrier apps, so your organization can deliver a more predictable and consistent experience across devices, and have greater freedom to customize device software.

**Choose your network.** Now you can easily optimize cellular and Wi-Fi connectivity by accessing the best network and plan at the moment, and stop paying more than necessary with monthly plans. Unlocked by Samsung smartphones work on most major U.S. networks<sup>1</sup> and allow international business travelers to take advantage of lower local rates.

### Defense-grade security.

**Defense-grade security from the chip up.** Samsung Knox™ is a security platform built from the chip up for superior protection and easy manageability.<sup>2</sup> Used by 30 governments and voted the "most strong" mobile security platform by Gartner,<sup>3</sup> Knox keeps hackers out and your data safe from the moment you turn it on.

**Keeping it secure.** The Galaxy Note8 Enterprise Edition keeps your team and your company secure, with regular monthly security updates for up to 3 years after market availability. It's simply all you need for data security.

### Premium partners, tailored solutions.

**Stronger together.** When you deploy a Samsung solution, you gain a powerful business partner. We work with trusted channel partners to create secure end-to-end solutions, tailored packages and custom experiences, so you can have absolute confidence you've got the right solution. The Samsung Enterprise Alliance Program (SEAP) supports with free access to SDKs, code libraries and support materials that help leverage Samsung Knox security and other exclusive device features. And we offer a wide range of MDM and EMM solutions to meet your specific business needs.

### A complete business ecosystem.

**Do more with Galaxy.** The Galaxy Note8 Enterprise Edition features an amazing Quad HD+ Super AMOLED display<sup>4</sup>, the smartest and most advanced S Pen yet, and IP68 water resistance.<sup>5</sup> But Galaxy is about more than just one device. It's an ecosystem of interlinked creative business technology that allows you to do what you can't. The Galaxy ecosystem enables you to stay mobile, work anywhere, and grow with your business.

**Count on continuity.** The Galaxy Note8 Enterprise Edition offers lifecycle management that delivers 2 years of purchase assurance, giving you business continuity so your people can work without interruption.

**Do bigger things.** It's time to do bigger things. It's time to be more impactful, efficient and secure. It's time to make an impact with the Galaxy Note8 Enterprise Edition, the ultimate device to power all your ambitions.
