**Installing your Microwave**

- **This microwave oven is designed for adaptation to the following three types of ventilation:**  
  A. Outside Top Exhaust (Vertical Duct)  
  B. Recirculating (Non-Vented Ductless)  
  C. Outside Back Exhaust (Horizontal Duct)  
- **The space between the cabinets must be 30” wide and free of obstructions:**  
- **This microwave oven is for installation over ranges up to 36” wide:**  
- **The microwave must be level. Use a level to make sure the cabinet bottom is level. If the cabinets have a front overhang only, with no back or side frame, install the mounting plate down the same distance as the front overhang depth. This will keep the microwave level:**

---

**FOR EASIER INSTALLATION AND PERSONAL SAFETY, WE RECOMMEND THAT TWO PEOPLE INSTALL THIS MICROWAVE OVEN. IMPORTANT: Do not grip or use handle during installation.**

**NOTE:** If your cabinet is metal, use the nylon grommet around the power cord hole to prevent cutting of the cord.

**NOTE:** We recommend using filler blocks if the cabinet front hangs below the cabinet bottom shelf.

**IMPORTANT:** If filler blocks are not used, case damage may occur from over tightening screws.

**NOTE:** When mounting the microwave oven, thread power cord through hole in bottom of top cabinet. Do not pinch cord or lift oven by pulling cord.
