SAMSUNG

A clear, simple solution for meeting rooms

EME Series 65"/75" displays with integrated HDBaseT receivers

Improve the clarity of meetings and huddle rooms with the Samsung EME Series displays. Featuring embedded HDBaseT receivers, they're simple ways of taking advantage of uncompressed content over long distance. Just connect a single Ethernet LAN cable, and you're ready to go. Installation is simple and clean, content is clear and sharp. With nothing lost in the translation, they're the ideal ways to enhance collaboration and communication.

Key features

Built-in* HDBaseT receiver

The built-in HDBaseT receiver on the EME Series allows you to take full advantage of HDBaseT, while simplifying installation. Connectivity is simple, and cable clutter is eliminated.

Connect through a single LAN cable

With an integrated HDBaseT receiver, the EME Series displays receive uncompressed Full HD multimedia content. The AV signal and control signal travel through a single LAN Ethernet cable. Content suffers no degradation, and the single cable allows a clean installation.

Meeting room console*

The included meeting room console serves as a table top remote control for volume change, source change and power ON/OFF.

Full HD and built-in speakers

The EME Series is meeting room-ready with Full HD resolution and built-in 10W x 2 stereo speakers. Images are clear, crisp and colorful. Audio is full and rich.

*Requires Samsung meeting box: SBB-MT12EA to work properly.
